COMPREHENSIVE ANNUAL FINANCIAL REPORT

For Fiscal Year Ended June 30, 1998

Prepared by the Office of the State Comptroller

NANCY WYMAN STATE COMPTROLLER

This publication will be made available, upon request, in large print, braille or audio cassette pursuant to the requestor's requirements.

i

STATE OF CONNECTICUT Office of the State Comptroller

The State Comptroller is one of the six State officers elected to hold office for a term of four years. The office of the State Comptroller was established in 1786 by an act of the General Assembly. The Constitutional Amendment of 1836 provided that the Comptroller be elected by the people in a manner similar to that of other State officers. Since 1838 this method has been in effect.

The Comptroller prescribes the mode of keeping and rendering all public accounts. She is required to adjust and settle all public accounts and demands, excepting grants and orders of the General Assembly. The Comptroller also renders a monthly accounting of the State's financial condition.

In addition, the Comptroller approves and records all obligations against the State. She maintains all official accounting records and is responsible for the employee payrolls for all State agencies, departments, and institutions. Her office administers all Retirement Systems other than Teachers' retirement. Additionally, the Comptroller administers numerous miscellaneous appropriations of the State.

DEPUTY COMPTROLLER

NANCY WYMAN COMPTROLLER

OFFICE OF THE STATE COMPTROLLER 55 ELM STREET HARTFORD, CONNECTICUT 06106-1775

December 31, 1998

To the Citizens of the State of Connecticut:

I am pleased to present this Comprehensive Annual Financial Report (CAFR) of the State of Connecticut for the fiscal year ended June 30, 1998.

This report was prepared in its entirety by this office and we take full responsibility for the accuracy of the data and the completeness and fairness of the presentation of the financial statements, supporting schedules, and statistical tables in it.

The CAFR is designed to be in conformance with generally accepted accounting principles (GAAP) for governmental units as promulgated by the Governmental Accounting Standards Board (GASB) as well as the reporting requirements prescribed by the Government Finance Officers Association and the American Institute of Certified Public Accountants. We believe that this report presents fairly the financial position of the state and the results of its operations as measured by the financial activity of its various funds. The report is consistent with full disclosure so that the reader may gain maximum understanding of the state's financial affairs. The report is presented in three sections:

The Introductory Section contains this transmittal letter, a list of the state's principal elected, appointed and administrative officials, an organizational chart of the state government, and a table of contents.

The Financial Section contains the Auditors of Public Accounts' report, the general purpose financial statements which include the notes to the financial statements, and the combining and individual fund and account group financial statements.

The Statistical Section contains comprehensive statistical data and selected financial and demographic information on a multi-year basis.

THE REPORTING ENTITY

Connecticut, a state of approximately 3.3 million people in an area of 5,009 square miles, has a developed infrastructure, technologically advanced industrial base and a strong insurance and financial services industry. The State of Connecticut ratified the Constitution of the United States on January 9, 1788. It has a legislative - executive - judicial form of government with a bicameral legislature (36 Senators, 151 Representatives). The Governor, Lieutenant Governor, Secretary of State, Treasurer, Comptroller, and Attorney General are independently elected for four-year terms. Senators and Representatives are elected for two-year terms.

The state provides a broad range of services including public safety, state highways and other transportation services, state parks, social services, higher education, health services, economic development, and regulatory responsibilities.

This report includes all the funds and account groups of the state as well as all of its component units. Component units are legally separate entities for which the primary government is financially accountable. Blended component units, although legally separate entities, are, in substance, part of the primary government's operations and are included as part of the primary government. Accordingly, the Connecticut Lottery Corporation is reported as an enterprise fund of the primary government. Discretely presented component units are reported in a separate column in the combined financial statements to emphasize that they are legally separate from the primary government. These would include the Connecticut Development Authority, Connecticut Housing Finance Authority, Connecticut Resources Recovery Authority, Connecticut Higher Education Supplemental Loan Authority, Connecticut Health and Educational Facilities Authority, and Connecticut Innovations, Incorporated.

STATE INITIATIVES

Tax Rebate and Other Tax Reductions

During 1998, the state implemented the first tax rebate program in Connecticut's history. As it became clear that the state was accumulating a significant general fund surplus for fiscal year 1998, State Comptroller Nancy Wyman proposed legislation to return the largest share of that surplus to state taxpayers. A majority of the surplus was generated by income tax receipts that exceeded budget expectations by \$461.1 million. Accordingly, Comptroller Wyman's proposal returned most of the surplus windfall to residents who paid the state income tax. Comptroller Wyman's plan also set aside funds to reduce the state's growing debt burden.

A slightly altered version of the Comptroller's tax rebate plan was adopted by the state legislature (Public Act 98-110). The legislature set aside \$115 million of the projected fiscal year 1998 general fund surplus for direct rebates to resident income tax payers. The maximum rebate amount was \$75 for single filers, \$120 for head of household filers, and \$150 for joint filers. Qualified income tax filers received the lesser of their final income tax liability or the maximum rebate; however, a minimum of \$50 was granted to all qualified taxpayers. The rebate checks were mailed to taxpayers in July 1998.

The rebate program reflects a continuing effort by state government to reduce the tax burden on Connecticut residents and businesses. During fiscal year 1998, new and phased-in tax reductions resulted in tax cuts of over \$300 million. The corporate tax rate on net income is being phased down from a nation leading 11.5 percent to 7.5 percent by fiscal year 2000; the state income tax rate has been reduced from 4.5 percent to 3 percent at various income levels, and the property tax credit has been increased to \$350; the inheritance tax will be eliminated by 2005; the sales tax on computer and data processing services, newspapers, repairs and replacement parts is being phased-out; and, the tax on gasoline has been reduced from 39 cents per gallon to 32 cents per gallon. By fiscal year 2002, these and other reductions will result in tax cuts of over \$1 billion for Connecticut residents and businesses.

Year 2000 Data Processing Readiness

Connecticut state government, like the rest of the world, is attempting to accommodate and upgrade its automated data processing and technology systems for the new millennium. In general terms, the year 2000 problem arises from the present use of two digits to identify the year in a date field with the assumption that "19" will always be the first two digits of the year. Accordingly, dates used in routine processing may be misinterpreted in the year 2000. Because the state relies heavily on its computer systems and other equipment containing date-sensitive technology, failure to adapt these systems to recognize the year 2000 could interrupt critical functions of state government.

The state's Department of Information and Technology (DOIT) with outside consulting assistance is coordinating the effort to prepare state agency and related systems for the year 2000. DOIT has been assessing the state's 1500 computer systems and 40,000 personal computers to determine their year 2000 conversion requirements. It is estimated that the state cost for year 2000 conversion will total \$104 million. To date \$95 million of the identified funding requirement has been provided by the legislature. DOIT has categorized 770 systems as critical to state operations. As of October 31, 1998, 63 percent of the critical systems requiring remediation had been converted, and 27 percent of the testing cycles required to validate compliance in mission critical systems had been competed. A target date of March 31, 1999 has been established for conversion and testing of all mission critical systems.

State Comptroller Nancy Wyman began work in 1995 to make the major financial and employee benefit systems under her control year 2000 compliant. The Comptroller's systems process in excess of \$15 billion in financial transactions annually.

By August of 1998 a majority of the Comptroller's systems had been converted. Comptroller Wyman was able to complete the conversion work for \$5 million less than the original cost estimate.

Expanding Health Insurance for Children

In recent years, despite an improving state economy, Connecticut has continued to experience growth in its uninsured population. The Census Bureau estimates that in 1997, 396,000 Connecticut residents under age 65 lacked health insurance coverage, representing 13.8 percent of the state's non-elderly population. Of this total, 93,000 were uninsured children. In response to this problem, the State Comptroller convened a task force to recommend possible solutions. The Work Group for Health Care Access issued its final report in January 1997 recommending expansion of Medicaid to cover as many of Connecticut's uninsured children as possible and improving outreach efforts to the thousands of children who are eligible, but not yet enrolled in the program.

Later in 1997, the Federal Balanced Budget Act included new funding for health coverage under the State Children's Health Insurance Program (SCHIP). Under the SCHIP provision, states were given the option of expanding Medicaid coverage for children or creating new programs within certain federal guidelines under Title XXI of the Social Security Act. Connecticut used this opportunity to create a new health insurance program called the HUSKY Plan -- Healthcare for UninSured Kids and Youth -- which was passed during the October 1997 Special Legislative Session.

The HUSKY (Title XXI) Plan began serving children July 1, 1998 and provides subsidized coverage -- cost sharing on a sliding scale -- for uninsured children who live in families that earn between 186 percent and 300 percent of the Federal Poverty Level (FPL). Families above 300 percent of the FPL can enroll children into the HUSKY program, but must pay the full premium cost. The benefit package provided is similar to the one offered to Connecticut state employees and their dependents. In addition, all children in families at or below 185 percent of the FPL are eligible for Medicaid (Title XIX) coverage, which provides a somewhat more comprehensive benefit package. For outreach and marketing purposes, however, both programs are now called "HUSKY." Medicaid is called HUSKY Part A and the new Title XXI plan is called HUSKY Part B. Outreach and marketing efforts will be coordinated for both programs and feature a single point-of-entry system.

Between July 1 and December 15, 1998, a total of 2,595 children have been approved for HUSKY Part B coverage and 2,382 have been enrolled into health plans. An additional 6,223 children have been identified as candidates for HUSKY Part A coverage (Medicaid) and their applications have been forwarded to the Department of Social Services (DSS) for processing. Of these, a total of 2,953 children have been granted eligibility, approximately 1,000 have been denied coverage and the remaining cases are pending. Presently, efforts are underway to improve enrollment by providing outreach grants to community-based organizations throughout the state. In addition, an effort is being made to simplify the application for HUSKY, which is seen by many as a barrier to entering the program.

Welfare Reform

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 fundamentally altered the federal government's approach to welfare. Previously, Connecticut received a 50 percent federal reimbursement for its expenditures under the Aid to Families with Dependent Children (AFDC) program. In its place, the welfare reforms of 1996 established a block grant, Temporary Assistance for Needy Families (TANF), designed to give states greater flexibility in providing public assistance. In contrast to AFDC, TANF benefits are limited to 5 years.

Implemented in January 1996, Connecticut's current cash assistance program for families with children, Jobs First, has a 21 month benefit limit for most recipients, although under limited circumstances extensions can be granted for six month at a time. In order to facilitate transition into the work force, Jobs First recipients who find work are entitled to keep their cash assistance, called Temporary Family Assistance, and all earnings up to the Federal Poverty Level (currently \$13,650 for a family of three) for the balance of their 21 months of eligibility. Additional assets can be retained under Jobs First and there are provisions for continued child care benefits and medical assistance (Medicaid) after termination of cash assistance.

Connecticut's current TANF block grant is \$266.8 million. As a condition of the grant, the state, under TANF's Maintenance of Effort (MOE) requirement, must maintain a certain spending level on welfare related programs. The basic MOE is 80 percent of federal fiscal year 1994 spending (\$244.6 million) for these programs; however, since Connecticut has met the federal work participation rate established under TANF, its current MOE is only 75 percent of historical spending levels, or \$183.4 million.

During fiscal year 1998, the Temporary Family assistance caseload declined dramatically, from 52,875 to 40,990. Implementation of welfare reform has coincided with a continued strong economy and it is unclear what percentage of former welfare recipients, now entering the workforce often for the first time, will remain employed in the event of an economic downturn.

OPERATING RESULTS

The fiscal year 1997-98 saw the deterioration of the state's financial condition slowed to the point where an operating surplus was realized for the first time.

- While this is the first year an operating surplus has been recorded at \$7 million, there have been nine years in a row of operating deficits highlighting the state's continual reliance on debt-financing.
- o Long-term obligations increased \$233 million, which will have to be financed by future generations.
- Debt service, excluding the debt service on the state's Economic Recovery Notes, was 10% of governmental operating expenditures, an increase from 9.1% in the prior year. In absolute terms, such expenditures increased 15%.
- Net debt per capita, also exclusive of the Economic Recovery Notes, rose to \$2,820 more than double that of fiscal 1990.
- o Government expenditures showed a slight increase from 10% to 10.1% of total personal income in the state when compared to the prior fiscal year, however, in absolute terms, expenditures increased 4.7%.

1997	11,751	117,564	10.0
1998	12,307	122,398 (2nd qrtr.)	10.1

* Includes general, special revenue and debt service funds. Operating expenditures also include higher education expenditures which are treated as an operating transfer out in the general fund.

Uncontrollable and fixed costs continued to consume a large share of the state's spending. Debt service, exclusive of the Economic Recovery Notes, increased to 10% of total governmental expenditures. Total debt service, including the Economic Recovery Notes, increased to 10.7% of governmental expenditures, still almost two times the ratio of fiscal year 1990. Medicaid spending rose slightly in fiscal year 1998 to \$2 billion, however, it still remains at almost one-fifth of total General Fund spending. The net state share of Medicaid, after adjusting for the 50% share of federal reimbursements, was \$308 for every man, woman, and child in Connecticut.

Deficit financing for operating purposes continued in fiscal year 1998. Operating deficits of \$335 million were incurred in the Grant and Loan Programs and the Housing Programs special revenue funds in fiscal year 1998. This represents 23% of total special revenue funds spending. Debt financing for these and other special revenue programs was \$417 million, which is approximately equal to our spending on legitimate capital needs for state facilities and infrastructure.

As a result, debt per capita, exclusive of the Economic Recovery Notes, increased to \$2,820 - over twice what it was in fiscal year 1990. The remaining Economic Recovery Notes constitute an additional \$24 of debt per capita.

General Fund

Fiscal year 1998 saw the state again end the year with a general fund operating surplus, the third year in a row, with revenues growing faster than expenditures.

GENERAL FUND OPERATING SURPLUS (DEFICIT)

	lions)

	, ,		-

	267	262	5	265
Total	<u>\$11,112</u>	<u>\$10,465</u>	<u>\$_647</u>	<u>\$10,219</u>

As shown above, except for taxes, the net increase of other sources of revenues is relatively minor. A further analysis of the tax revenues shows that with the exception of the personal income tax and the sales and use tax, tax revenues continue to be fairly stagnant, increasing marginally or even decreasing. Revenue from the personal income tax increased by \$398 million, an increase of approximately 14% while the sales and use tax increased \$161 million or an increase of 6.2%.

GENERAL FUND TAX REVENUES (millions)

	<u>FY 98</u>	<u>FY 97</u>	Change	<u>FY 96</u>
Personal Income	\$3,197	\$2,799	\$398	\$2,606

GENERAL FUND EXPENDITURES

*Includes Medicaid expenditures.

Special Revenue Funds

Special revenue funds continue to be heavily debt-financed, suggesting that we are burdening future generations of taxpayers with the cost of current programs. Grant and loan programs and housing programs have shown operating deficits for the last five years. To the extent that loan programs result in receivables that can be counted on to mature in time to service the related debt, a case may be made that the economic benefits accrue to current and future taxpayers. Financing grants with debt, however, should be undertaken sparingly and in unusual circumstances.

SPECIAL REVENUE FUND OPERATING RESULTS (millions)									
Fiscal year deficits:	<u>FY 98</u>	<u>FY 97</u>	<u>FY 96</u>	<u>FY 95</u>	<u>FY 94</u>				
Transportation	\$ (25)	\$ 47	\$ 14	\$ 17	\$ (10)				
Grant and Loan Programs	(304)	(297)	(301)	(307)	(306)				
Housing Programs	(31)	(44)	(36)	(32)	(54)				
Other, net	<u>(22</u>)	<u>(53</u>)	<u>(66)</u>	<u>(59)</u>	(46)				
Deficits before proceeds		-							
from debt financing	(382)	(347)	(389)	(381)	(416)				
Proceeds from debt financing	<u>419</u>	429	_405	481	<u>480</u>				
Surplus	<u>\$_37</u>	<u>\$ 82</u>	<u>\$ 16</u>	<u>\$ 100</u>	<u>\$ 64</u>				

The operating deficits primarily arose in the Grant and Loan Programs Fund and the Housing Programs Fund. The Grant and Loan Fund expended \$316 million in fiscal year 1998 supported by revenues of only \$11 million. Bond proceeds of \$292 million and fund balance resources financed the balance. The Housing Programs Fund expended \$35 million in fiscal year 1998. Like the Grant and Loan Programs Fund, the balance was financed by \$51 million of bond proceeds and \$6 million of revenues.

Other major special revenue funds include the Transportation Fund, which is generally self-supporting. Expenditures and transfers of \$1,002 million were supported by revenues of \$977 million in fiscal year 1998. The fund balance of the Transportation Fund was \$113 million or 11% of expenditures and transfers.

The Employment Security Administration Fund expended \$103 million on administration of the unemployment compensation program, supported by a like amount of federal financial assistance.

The Environmental Programs Fund also required debt financing. Expenditures and transfers of \$99 million were supported by \$41 million of revenues and transfers, along with bond proceeds of \$60 million and additional fund balance resources.

Capital Projects Funds

Capital spending has averaged \$800 million for the past five years with most of that spending directed toward infrastructure projects. Approximately 60% of infrastructure expenditures were financed by federal aid and the balance by state debt. Unlike the deficit financing of certain special revenue funds, the debt used to finance capital construction will provide a tangible benefit to the future generation of taxpayers who will use the asset for which they will pay the debt service. In addition, these infrastructure investments improve the economic climate of the state both immediately and for many years to come.

TREND IN CAPITAL PROJECTS EXPENDITURES (millions)									
Fiscal Year	State Facilities	Infrastructure	Transportation	Total					
1998	\$165	\$479	\$43	\$687					
1997	178	598	25	801					
1996	143	533	14	690					
1995	286	668	3	957					
1994	170	699	1	870					

Expendable Trust Funds

The Employment Security Fund continues to have a growing fund balance with expenditures (unemployment compensation claims) the lowest in five years.

EMPLOYMENT SECURITY FUND (millions)

			Surplus	Fund
Fiscal Year	Revenues	Expenditures	(Deficit)	Balance
1 998	\$ 658	\$382	\$276	\$739
1997	635	411	224	463
1996	590	478	112	239
1995	559	484	75	127
1994	1,400	619	781	52

Pension Trust Funds

Net assets of the pension trust funds increased 15.6% for 1998. The State Employees' Retirement System (SERS), by far the largest pension fund for state employees (the Teachers' Retirement System primarily serves municipal employees), funded status increased to 58.1% as of fiscal year 1998 as compared to 51.4% as of fiscal year 1994. The Teachers' Retirement System (TRS) funded status increased from 66.6% to 69.1%, and the Judicial Retirement System (JRS) from 40.5% to 52.4% respectively.

PENSION FUNDED STATUS

	<u>FY 98</u>	<u>FY 97</u>	<u>FY 96</u>	<u>FY 95</u>	<u>FY 94</u>
SERS	58.1%	56.6%	53.7%	53.8%	51.4%
TRS	69.1	69.1	68.1	68.1	66.6
JRS	52.4	48.2	45.6	42.7	40.5

Enterprise Funds

Two major changes to the enterprise funds combined financial statements occurred in fiscal year 1997. The Connecticut Lottery Corporation was created by the legislature as a public instrumentality and political subdivision of the state and was, accordingly, added to the enterprise fund category. Secondly, the John Dempsey Hospital Fund was reclassified out of the higher education funds group after it was determined that the fund was better suited to enterprise fund type accounting. The largest fund, the Connecticut Lottery Corporation, continues to provide substantial support to the General Fund with revenues of \$806 million providing \$267 million to the General Fund after prizes and expenses of \$549 million.

1997	938	681	257	(244)	13	162

Higher Education

Expenditures grew at a rate of 7.5% in fiscal year 1998, with State support keeping pace. Total revenues increased 11% over fiscal year 1997 with Federal and State Grants and Patient Services showing the biggest increases.

Debt Administration

State general obligation bonds are rated Aa3, AA, and AA by Moody's, Standard and Poor's, and Fitch IBCA, respectively, while transportation-related special tax obligation bonds are currently rated A1, AA-, and AA-, respectively.

The state issued approximately \$.8 billion of bonds in fiscal year 1998, a decrease from the past two fiscal years. To the extent this bonding is for infrastructure or other assets benefiting future taxpayers, the debt is fully justifiable. The continued increase in the debt burden, however, particularly that portion that is used to finance current programs, bodes ill for the future. It means that future generations will pay for the sins of the past. And it means that the state will have reduced flexibility in future budgets, which will now be burdened by higher fixed costs for debt service.

Debt per capita has more than doubled to \$2,820 from \$1,204 in fiscal year 1990. Bonded debt is the primary focus of most analyses but it is only half the amount of incurred long-term obligations that will need to be paid by future generations of taxpayers. Long-term obligations also include capital leases; compensated absences that were earned by employees in past periods but which will be paid by future generations; workers' compensation claims, which arose from past events but will be settled in future periods; and the unfunded actuarial accrued liability, which represents the value of pension benefits earned by employees but which is not funded currently. The total of these obligations increased \$233 million in fiscal year 1998.

Internal Controls

Elected officials, agency commissioners, directors of public benefit corporations and agency managers are responsible for establishing internal control structures. Good internal controls are essential to achieving the proper conduct of government business with full accountability. This means that:

o resource use is consistent with laws, regulations and policies;

- o resources are safeguarded against waste, loss and misuse; and
- o reliable data are obtained, maintained and fairly disclosed in reports.

Good internal controls also facilitate the achievement of management objectives. In achieving these goals, good internal controls must strike a balance, providing reasonable, not absolute assurance. This recognizes that costs should not exceed benefits, nor should controls negatively impact operations.

Good internal control is comprised of the following elements:

- Control Environment which reflects the overall attitude, awareness, and actions of elected officials or agency managers concerning the importance of control and its emphasis in state government (i.é. What is the tone at the top?)
- Accounting System which consists of the methods and records established to identify, assemble, analyze, classify, record, and report transactions and to maintain accountability over state resources.
- Control Procedures which includes those procedures that elected officials and management have established to provide reasonable assurance that specific objectives are being achieved.

This office has been making consistent efforts to improve the overall internal control in state government and simultaneously to give managers authority commensurate with their responsibilities.

Budgetary Controls

The key control mechanism of government finance is the budget. The Government Accounting Standards Board (GASB) has concluded that, "The budgetary process, including comparison of the approved budget with actual experience, is... a major aspect of accountability." The budget is more than just an aspect of accountability, however, it is also:

- An expression of public policy that identifies that activity or program to be carried out, the amounts that may be expended for these purposes, and the time period in which these are to occur.
- A financial plan, or expression of financial intent. For example, what are the expected sources of financing for these programs who bears the burden of paying for them?
- A form of control usually having the force of law.

Budget control is maintained at the individual appropriation account level by agency as established in authorized bills. Control over the obligation is exercised by the allotment process. Funds, both for budgeted and non-budgeted funds, are allotted by the Governor through the Office of Policy and Management. The Governor is further allowed to modify the allotments up to 3% of the fund or 5% of the appropriation amount. Modifications beyond those limits, but not in excess of 5% of the total funds, require the approval of the Finance Advisory Committee, which is comprised of the Governor, the Lieutenant Governor, the Treasurer, the Comptroller, two senate members, not of the same party, and three house members, not more than two of the same political party.

Cash and Investments Management

The State Treasurer continually monitors cash flow to maximize the utilization of cash resources. During the year, temporary balances are invested in the State's short-term investment fund, a money market investment pool whose investments consist of certificates of deposit, bankers' acceptances, commercial paper, repurchase agreements, federal agency securities, and other investments with various ranges of maturities. The investment income and average yield rate for the fiscal year 1997-98 for this fund was approximately \$174 million and 5.82%, respectively. By comparison, 90-day Treasury Bills and 90-day Certificates of Deposit earned 5.17% and 5.62%, respectively, during the same time period.

Bank balances at June 30, 1998, were \$139 million of which about fifty-six percent was not insured or protected by collateral.

Risk Management

The state retains risk for certain property and liability claims, including workers' compensation. The State Insurance Purchasing Board serves as the focal point of risk management and insurance matters, maintaining a balance of commercially placed coverage and risk retention to provide optimal coverage at minimal cost.

ECONOMIC CONDITION AND OUTLOOK

Connecticut entered into a long period of recession during the winter of 1989. The recession officially ended in December 1992 after claiming 158,200 jobs. Connecticut's recovery began slowly with little employment growth between 1993 and 1995. Beginning in 1996, there were signs that the state's economy was gathering significant strength. Today, Connecticut has regained over 80 percent of the jobs lost to recession, and has posted strong income gains. During the course of the recovery, Connecticut's economy has become increasingly diversified with much of its employment growth coming from medium and small businesses in the service industries (business and personal services, health, legal, private educational, etc.) rather than from large manufacturing concerns and the insurance industry. Exports have also played a major role in this expansion.

While most of the state's economic news is good, there continue to be areas of concern: inflation adjusted median household income, although increasing, remains 25 percent below the peak level achieved in 1989; unemployment in the state's urban areas is almost double the rate for the state as a whole; child poverty is increasing at an alarming rate; and, Connecticut ranks as one of the top five states in income inequality. Failure to address these structural imbalances in the state economy could compromise future economic growth.

According to a report by the New England Economic Project, Connecticut, like the nation, will experience steady but slower economic growth in the coming years. The economic fundamentals in the state are expected to remain sound; however, risks associated with national and world economic events reduce the potential for above average growth.

Employment

- In 1997, seasonally adjusted non-farm payroll employment grew 2.5 percent in the state. This represents the strongest rate of growth in more than a decade. Through October 1998, employment growth slowed to 1.4 percent on an annualized basis.
- Between 1991 and 1995, Connecticut's labor force lost 140,000 workers, which was associated with a large negative net migration during the period. Over the past several years the state's labor force has stabilized, but has failed to grow.
- Connecticut's unemployment rated dipped to 3.8 percent in October 1998, which is well below the national level of 4.6 percent for the period.
- Over the past ten years, manufacturing's share of total state employment has slipped from 18.6 percent in 1988 to 14.1 percent in 1997. The employment share of the finance, insurance and real estate industry has declined from 11.6 percent to 9.5 percent during the period. These declines have been offset by employment share growth in the services sector, which accounted for 27.1 percent of all employment in 1988 and 34.4 percent of the total in 1997.
- The fastest growing occupations in Connecticut are as follows: computer engineer; systems analyst; sales agent (securities and financial); physical therapist; human services; and, home health aides.

• The fastest growing industries are as follows: securities services; amusement and recreational services; hotel and lodging; social services; business services; and, general building contractors.

Income

- Connecticut continues to lead the nation in per capita income with a 1997 level of \$35,954. The state also experienced the strongest per capita income growth rate in the country at 6.3 percent for 1997.
- Connecticut's per capita income exceeds that of the nation by 42.1 percent, and is 18.1 percent above New England's per capita income level.
- Average earnings per job in Connecticut increased by 5.3 percent in 1997 to a total of \$39,435. This is the best rate of earnings growth since 1989.
- Inflation adjusted median household income grew by 2.1 percent in 1997 to \$43,985; however, this is 25 percent below the peak level achieved in 1989.
- Almost half of the state's total earnings come from the services and manufacturing sectors. Although the finance, insurance and real estate (FIRE) sector has declined in its share of total state employment, the share of total earnings that it contributes has increased from 11.5 percent in 1988 to 13.6 percent in 1997. This places the FIRE sector as the third largest contributor to total state earnings.

Other Indicators

- In 1997, Connecticut exports grew 14 percent from the prior year to \$7.8 billion, which is about 6 percent of Gross State Product. This was the largest increase in exports since 1990. Export results for the first half of 1998 showed little growth, primarily due to the financial crisis in Asia.
- New auto registrations expanded 21.5 percent between 1996 and 1997. Solid growth has continued into the first half of 1998.
- New housing permits have been trending upward since 1996. In 1997, permits increased 5.6 percent over the prior year. Monthly increases have been strong for 1998. In October 1998, new housing permits increased 20.3 percent over the same month the previous year.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Connecticut for its comprehensive annual financial report for the fiscal year ended June 30, 1997. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The State of Connecticut has received a Certificate of Achievement for the last nine consecutive years (fiscal years ended 1989-1997). We believe our current report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to GFOA.

Independent Audit

The Auditors of Public Accounts, who report to the legislature and are independent of the executive Branch, have audited the accompanying financial statements in accordance with generally accepted auditing standards and their opinion has been included in this report.

ACKNOWLEDGMENTS

I wish to express my appreciation to the many individuals in all agencies whose cooperation and assistance has made this report possible. In addition, the efforts of the GAAP Reporting Unit and others in our Budget and Financial analysis Division deserve special acknowledgment.

Sincerely,

ân

Nancy Wyman State Comptroller

Certificate of Achievement for Excellence in Financial Reporting

Presented to

State of Connecticut

For its Comprehensive Annual **Financial Report** for the Fiscal Year Ended June 30, 1997

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

INDEPENDENT AUDITORS' REPORT

Governor John G. Rowland Members of the General Assembly

We have audited the accompanying general purpose financial statements of the State of Connecticut as of and for the year ended June 30, 1998, as listed in the table of contents. These general purpose financial statements are the responsibility of the State's management. Our responsibility is to express an opinion on these general purpose financial statements based on our audit. We did not audit the financial statements of the Special Transportation Fund accounts within the Transportation Fund, which represent 14 percent and 77 percent, respectively, of the assets and revenues of the Special Revenue Funds; we did not audit the financial statements of the Transportation Special Tax Obligations Fund, which represent 100 percent and 99 percent, respectively, of the assets and revenues of the Debt Service Funds; we did not audit the financial statements of the Bradley International Airport, the Connecticut Lottery Corporation, or the John Dempsey Hospital Fund, which represent 86 percent and 99 percent, respectively, of the assets and revenues of the Enterprise Funds; we did not audit the financial statements of the Clean Water Fund, which represent four percent and one percent, respectively, of the assets and revenues of the Trust and Agency Funds; we did not audit the financial statements of the Connecticut Housing Finance Authority, the Connecticut Resources Recovery Authority, the Connecticut Development Authority, the Connecticut Health and Educational Facilities Authority, the Connecticut Higher Education Supplemental Loan Authority, and Connecticut Innovations Incorporated, which represent 100 percent of the assets and revenues of the Component Unit Funds; and, we did not audit the financial statements of the Connecticut State University or the University of Connecticut Foundation, which represent 35 percent and 38 percent, respectively, of the assets and revenues of the Higher Education and University Hospital Funds. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the aforementioned funds and accounts, is based solely on the reports of other auditors. All of the aforementioned audits were conducted in accordance with generally accepted auditing standards. In addition, the audits of the Connecticut Resources Recovery Authority, Connecticut Higher Education Supplemental Loan Authority, Connecticut Housing Finance Authority, Connecticut Development Authority, Connecticut Lottery Corporation, Connecticut Innovations Incorporated, and Clean Water Fund, were conducted in accordance with standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Except as discussed in the following paragraph, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, except that the audits of certain component units of the State, as described above, were not conducted in accordance with *Government Auditing Standards*. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinion.

Governmental Accounting Standards Board Technical Bulletin 98-1, *Disclosures About Year 2000 Issues*, requires disclosure of certain matters regarding the year 2000 issue. The State of Connecticut has included such disclosures in Note 25. Because of the unprecedented nature of the year 2000 issue, its effects and the success of related remediation efforts will not be fully determinable until the year 2000 and thereafter. Accordingly, insufficient audit evidence exists to support the State of Connecticut's disclosures with respect to the year 2000 issue made in Note 25. Further, we do not provide assurance that the State of Connecticut is or will be year 2000 ready, that the State of Connecticut's year 2000 remediation efforts will be successful in whole or in part, or that parties with which the State of Connecticut does business will be year 2000 ready.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding year 2000 disclosures, and based on our audit and the reports of other auditors, the general purpose financial statements referred to above present fairly, in all material respects, the financial position of the State of Connecticut as of June 30, 1998, and the results of its operations and the cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we have also issued a report dated December 31, 1998, on our consideration of the State of Connecticut's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants.

As discussed in Note 23 to the financial statements, the State of Connecticut is a defendant in certain legal proceedings. The ultimate outcome of the litigation cannot presently be determined. Accordingly, no provision for any liability that may result upon adjudication has been made in the accompanying financial statements

Our audit was performed for the purpose of forming an opinion on the general purpose financial statements of the State of Connecticut taken as a whole. The combining and individual fund and account group financial statements and schedules listed in the table of contents are presented for purposes of additional analysis and are not a required part of the general purpose financial statements. Such information has been subjected to the auditing procedures applied in the audit of the general purpose financial statements and, in our opinion, is fairly presented, in all material respects, in relation to the general purpose financial statements taken as a whole. The data in the statistical section listed in the table of contents was not audited by us and, accordingly, we express no opinion thereon.

June 30, 1998

Note 1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Basis of Presentation

The accompanying financial statements of the State of Connecticut have been prepared in conformity with generally accepted accounting principles as prescribed in pronouncements of the Governmental Accounting Standards Board (GASB), except for the financial statements of the University of Connecticut Foundation, Incorporated (an affiliated organization). Those statements are prepared according to generally accepted accounting principles as prescribed in pronouncements of the Financial Accounting Standards Board.

During the year, the State implemented GASB Statement No. 31, "Accounting and Financial Reporting for Certain Investments and for External Investment Pools." This statement requires the State to report certain investments at fair value and the external portion of the Short-Term Investment Fund as a separate investment trust fund (see Note 4).

b. Financial Reporting Entity

As required by generally accepted accounting principles, the accompanying financial statements include (1) all funds, agencies, boards, commissions, and account groups that comprise the State's legal entity, (2) legally separate organizations for which the State is financially accountable (component units), and (3) a legally separate organization for which the nature and significance of its relationship with the State is such that exclusions would cause the State's financial statements to be misleading (affiliated organization). Financial accountability exists if (1) the State appoints a voting majority of the organization's governing board and (2) the State is able to impose its will on the organization, or there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State.

Component Units

Component units are reported in the combined financial statements either in a separate column (discrete presentation) or in combination with similar funds of the State (blending presentation).

Discretely Presented Component Units

This column includes legally separate organizations for which the State appoints a voting majority of the organization's governing board and is contingently liable for the organization's debt, or provides significant funding for the organization's programs (applies only to the Connecticut Innovations, Incorporated). The financial data of the following organizations is included in this column.

Connecticut Development Authority (CDA)

The Authority is a public instrumentality and political subdivision of the State. It was created to stimulate industrial and commercial development within the State through its Self-Sustaining Bond, Umbrella, and Insurance programs as well as other economic development programs.

Connecticut Housing Finance Authority (CHFA)

The Authority is a public instrumentality and political subdivision of the State. It was created for the purpose of increasing the housing supply and encouraging and assisting in the purchase, development and construction of housing for low and moderate families and persons throughout the State. The Authority's fiscal year is for the period ending on December 31, 1997.

Connecticut Resources Recovery Authority (CRRA)

The Authority is a public instrumentality and political subdivision of the State. It is responsible for implementing the State Solid Waste Management Plan by determining the location of and constructing solid waste management projects, owning, operating, and maintaining waste management projects, or making provisions for operation and maintenance by contracting with private industry.

Connecticut Higher Education Supplemental Loan Authority (CHESLA)

The Authority is a public instrumentality and political subdivision of the State. It was created to assist students, their parents and institutions of higher education to finance the cost of higher education through its Bond funds.

Connecticut Health and Educational Facilities Authority (CHEFA)

The Authority is a public instrumentality and political subdivision of the State. The purpose of the Authority is to assist certain health care institutions, institutions of

higher education, and qualified for-profit and not-forprofit institutions in the financing and refinancing of projects to be undertaken in relation to programs for these institutions.

Connecticut Innovations, Incorporated (CII)

The Authority is a public instrumentality and political subdivision of the State. It was established to stimulate and promote technological innovation and application of technology within Connecticut and encourage the development of new products, innovations, and inventions or markets in Connecticut by providing financial and technical assistance.

Condensed financial information for the major component units is disclosed in Note 21. Complete financial statements of the individual component units can be obtained from their respective administrative offices.

Blended Component Unit

The Connecticut Lottery Corporation was created in July 1996 as a public instrumentality and political subdivision of the State. The purposes of the Corporation are to generate and manage the State's lottery in an entrepenurial and business-like manner and to provide continuing and increased revenue to the people of the State. The State appoints a voting majority of the Corporation's governing board, and the Corporation provides revenue to the State. In the combined financial statements, the Corporation is included in the Enterprise funds group (Primary Government).

Affiliated Organization

The University of Connecticut Foundation, Incorporated is a nonprofit corporation created exclusively to solicit, receive, and administer gifts and financial resources from private sources for the benefit of all campuses and programs of the University of Connecticut. The Foundation is not financially accountable to the University. However, the Foundation is included as a component unit because the nature and significance of its relationship to the University are such that exclusion would cause the University's financial statements to be misleading. The Foundation is reported in a separate column in the higher education funds group (Primary Government).

c. Fund Accounting

The financial activities of the State are accounted for in individual funds and account groups.

A fund is a fiscal and accounting entity with a selfbalancing set of accounts recording cash and other

financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations. In the financial statements, individual funds are classified in four fund categories and component units. The four fund categories are governmental funds, proprietary funds, fiduciary funds, and higher education funds.

Account groups are accounting entities used to account for the State's general fixed assets and long-term debt. These account groups are not funds because they do not reflect available financial resources and related liabilities. In the financial statements, the account groups are the general fixed asset account group and the general long-term debt account group.

Because the State of Connecticut has a significant number of legal funds, a functional basis combining presentation was chosen to facilitate the preparation and readability of the Comprehensive Annual Financial Report (CAFR). More detailed information on the legal funds can be found in the Annual Report of the Comptroller - a "modified cash" basis document also produced by the Office of the Comptroller.

Following is a description of the fund categories, account groups, and component units used in the accompanying financial statements.

Governmental Funds

1. <u>General Fund</u> - The General Fund is the general operating fund of the State. It is used to account for all financial resources obtained and spent for those services normally provided by the State (e.g. health, social assistance, education, etc.), which are not accounted for in other funds.

2. <u>Special Revenue Funds</u> - These funds are used to account for the proceeds of specific revenue sources (other than expendable trusts, major capital projects, and higher education sources) that are legally restricted to expenditures for specified purposes. For example, motor fuel taxes levied to fund Department of Transportation costs.

3. <u>Debt Service Fund</u> - This fund is used to account for the accumulation of resources for, and the payment of, principal and interest on general long-term bonds and notes.

4. <u>Capital Projects Funds</u> - These funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities and infrastructure projects (other than those financed by proprietary funds and higher education funds).

Proprietary Funds

1. <u>Enterprise Funds</u> - These funds are used to account for operations that (a) are financed and operated in a manner similar to private business enterprises - where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability or other purposes.

2. <u>Internal Service Funds</u> - These funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the State, or to other governments, on a cost-reimbursement basis.

Fiduciary Funds

<u>Trust and Agency Funds</u> - These funds are used to account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and other funds. These funds include expendable trust funds, nonexpendable trust funds, pension trust funds, an investment trust fund, and agency funds.

Account Groups

1. <u>General Fixed Asset Account Group</u> - This account group includes all the fixed assets (excluding infrastructure) that are not accounted for in the proprietary and higher education funds.

2. <u>General Long-Term Debt Account Group</u> - This account group includes all long-term obligations which are to be financed from governmental funds. These long-term obligations include the following:

• Unmatured principal on general obligation and transportation related bonds and notes.

• Other non-current liabilities for capital leases, compensated absences, unfunded pension costs, workers' compensation claims, and claims and judgements.

Higher Education Funds

The financial activities of the State's higher education institutions (University of Connecticut, State universities, and community-technical colleges) and an affiliated organization are accounted for in these funds, which are reported in a separate column in the combined financial statements (Primary Government).

The following fund categories and affiliated organization are included:

1. <u>Current Funds</u> - These funds are used to account for resources that will be expended in the near future for operating purposes. Included in the current fund category are unrestricted funds that the governing boards retain full control of, in achieving the institutions' purposes and restricted funds that may be utilized only in accordance with external restrictions.

2. <u>Endowment Funds</u> - These funds account for gifts that are restricted as to principal by the donor.

3. <u>Loan Funds</u> - These funds are used to account for loans to students and for resources available for such purposes.

4. <u>Plant Funds</u> - These funds account for resources that have been or will be used for institutional property acquisition, renewal and replacement, and resources accumulated for the retirement of debt associated with institutional properties.

5. <u>Agency Funds</u> - These funds are funds held by an institution as custodian or fiscal agent for others such as student organizations, individual students, or faculty members.

6. <u>Affiliated Organization</u> - This column accounts for the financial activities of the University of Connecticut Foundation, Inc., a component unit of the University of Connecticut.

Component Units

The component units include proprietary type organizations that are legally separate from the State but that are considered part of the reporting entity.

d. Basis of Accounting

The accounting and financial reporting treatments applied to a fund is determined by its measurement focus and basis of accounting, which are described as follows:

Governmental Funds and Expendable Trust Funds

These funds are accounted for using a current financial resources measurement focus and a modified accrual basis of accounting. Under the current financial resources measurement focus, only current assets and liabilities are normally included on the balance sheet. Fund balance represents a measure of "available spendable resources." Under the modified accrual basis of accounting, revenues are recorded when they are susceptible to accrual (i.e. both measurable and available). The word "available" means that the revenue is collectible within the current period or soon enough thereafter to pay period liabilities. Expenditures are recorded when the related fund liability is incurred except for principal and interest on general long-term debt which are recorded as expenditures when due. Major revenue sources that are treated as susceptible to accrual include sales and use taxes, personal income taxes, public service corporation taxes, and special fuel taxes. Revenues from restricted grants (federal or other) are recorded when the related expenditure has been incurred. Medicaid revenue is recorded when the related receivable is recorded.

Proprietary Funds, Nonexpendable Trust Funds, Pension Trust Funds, Investment Trust Fund, Component Units, and Affiliated Organization

These funds are accounted for using a flow of economic resources measurement focus and an accrual basis of accounting. Under the flow of economic resources measurement focus all assets and liabilities are included on the balance sheet. Fund equity (proprietary funds and component units) is segregated into contributed capital and retained earnings components. Under the accrual basis of accounting, revenues are recorded when earned and expenses are recorded when incurred.

According to GASB Statement No. 20, these funds must comply with all applicable GASB pronouncements and all applicable pronouncements issued by the Financial Accounting Standards Board (FASB) and its predecessors as follows (provided those pronouncements do not conflict with or contradict GASB pronouncements).

	FASB Statements Issued on or Prior to 11/30/89	FASB Statements <u>Issued to Date</u>
Proprietary Funds	x	
Nonexpendable Trust Funds	x	•
Pension Trust Funds	x	· · ·
Investment Trust Fund	x	,
Component Units: Conn. Development Authority		x
Conn Housing Finance Authority		
Conn. Resources Recovery Auth Conn. Higher Education	ority A	
Supplemental Loan Authority Conn. Health & Educational	Х	
Facilities Authority		х
Conn. Innovations, Inc.	х	

Agency Funds

These funds are accounted for using a modified accrual basis of accounting. Agency funds are custodial in nature (assets equal liabilities) and do not measure nor report results of operations.

Higher Education Funds

These funds (excluding the affiliated organization) are accounted for using a current financial resources measurement focus and an accrual basis of accounting with the following exceptions:

- All assets and liabilities are included on the balance sheet.
- Depreciation expense related to plant fund fixed assets is not recorded, except for fixed assets reported by the University of Connecticut.
- Revenues and expenditures of an academic term covering more than one fiscal year are reported in the fiscal year in which the program is predominately conducted.

e. Budgeting Process

By statute, the Governor must submit the State budget to the General Assembly in February of every other year. Prior to June 30, the General Assembly enacts the budget through the passage of appropriation acts for the next two fiscal years and sets forth revenue estimates for the same period for the following funds: the General Fund, the Transportation Fund, the Mashantucket Pequot Fund, the Workers' Compensation Administration Fund, the Banking Fund, the Consumer Counsel and Public Utility Control Fund, the Insurance Fund, the Criminal Injuries Fund, the Soldiers, Sailors, and Marines Fund and Regional Market Operations Fund. Under the State Constitution, the Governor has the power to veto any part

of the itemized appropriations bill and to accept the remainder of the bill. However, the General Assembly may separately reconsider and repass the disapproved items by a two-thirds majority vote of both the Senate and the House.

Budgetary control is maintained at the individual appropriation account level by agency as established in authorized appropriation bills and is reported in the Annual Report of the State Comptroller. A separate document is necessary because the level of legal control is more detailed than reflected in the CAFR. Before an agency can utilize funds appropriated for a particular purpose, such funds must be allotted for the specific purpose by the Governor and encumbered by the Comptroller upon request by the agency. Such funds can then be expended by the Treasurer only upon a warrant, draft or order of the Comptroller drawn at the request of the responsible agency. Expenditure control over special revenue, enterprise, and internal service funds that are not budgeted as part of the annual appropriation act is maintained by the allotment process.

The Governor has the power under Connecticut statute to modify budgetary allotment requests the for administration, operation and maintenance of a budgeted agency. However, the modification cannot exceed 3% of the fund or 5% of the appropriation amount. Modifications beyond those limits, but not in excess of 5% of the total funds, require the approval of the Finance Advisory The Finance Advisory Committee is Committee. comprised of the Governor, the Lieutenant Governor, the Treasurer, the Comptroller, two senate members, not of 2. Expenditures are recorded when paid in cash the same political party, and three house members, not more than two of the same political party. Additional reductions of appropriations of more than 5% of the total appropriated fund can be made only with the approval of the General Assembly.

All funds except fiduciary funds use encumbrance accounting. Using this method of accounting, purchase orders, contracts, and other commitments for the expenditures of the fund are recorded in order to reserve that portion of the applicable appropriation. All encumbrances lapse at year-end and, generally, all appropriations lapse at year-end except for certain continuing appropriations (continuing appropriations are defined as carry forwards of spending authority from one fiscal budget into a subsequent budget). The continuing appropriations include: appropriations continued for a onemonth period after year-end which are part of a program that was not renewed the succeeding year; appropriations

continued the entire succeeding year, as in the case of highway and other capital construction projects; and appropriations continued for specified amounts for certain special programs. Carried-forward appropriations are reported as reservations of the fund balance in the financial statements.

The budget is prepared on a "modified cash" basis of accounting under which revenues are recognized when received, except for certain taxes and Federal and other restricted grant revenues of the General and Transportation funds which are recognized when earned. Tax revenues recognized when earned include the following: sales and use, personal income, corporation, public service corporations, petroleum companies, cigarettes, alcoholic beverages, gasoline, special motor fuel, and motor carrier road. Under the modified cash basis, expenditures are recognized when paid. A comparison of actual results of operations recorded on this basis and the adopted budget is presented in the financial statements for all governmental funds for which a budget is legally adopted.

f. Budgetary vs GAAP Basis of Accounting

The major differences between the budgetary (legal) and the GAAP (generally accepted accounting principles) basis of accounting are as follows:

1. Revenues are recorded when received in cash except for certain year-end accruals (budgetary basis) as opposed to revenues being recorded when they are susceptible to accrual (GAAP basis) (see Note 1d).

(budgetary basis) as opposed to expenditures being recorded when the related fund liability is incurred (GAAP basis) (see Note 1d).

3. For budgetary reporting purposes, continuing appropriations are included with expenditures to determine the budgetary surplus or deficit because they are considered uses of spending authority for the fiscal year. But under the GAAP basis, continuing appropriations are not included as expenditures.

4. Certain special revenue funds are not subject to legal budgets.

Because of the above differences, a reconciliation between the budgetary and GAAP basis is presented in Note 2.

g. Assets and Liabilities

Cash and Cash Equivalents (see Note 4)

In addition to petty cash and bank accounts, this account includes cash equivalents - short-term, highly liquid investments with original maturities of three months or less when purchased. Cash equivalents include investments in the Short-Term Investment Fund ("STIF") and the Tax Exempt Proceeds Fund, Inc. ("TEPF"). TEPF is a short-term, tax-exempt money market fund reported under the Investment Company Act of 1940. Investments in STIF and TEPF are reported at the fund's share price.

Investments (see Note 4)

Equity in Combined Investment Funds is reported at fair value based on the funds' current share price.

External investment pool is reported at amortized cost.

Other investments are reported at fair value, except for the following investments which are reported at cost or amortized cost:

- Nonparticipating interest-earning investment contracts.
- Money market investments that mature within one year or less at the date of their acquisition.
- o CHFA's investments.

Fair value is determined based on quoted market prices.

The State invests in derivatives. These investments are held by STIF and the Combined Investment Funds.

Inventories

Inventories are reported at cost. Cost is determined by the first-in first-out (FIFO) method. Inventories in the governmental funds consist of expendable supplies held for consumption whose cost was recorded as an expenditure at the time the individual inventory items were purchased. Reported inventories in these funds are offset by a fund balance reserve to indicate that they are unavailable for appropriation.

Fixed Assets and Depreciation

General fixed assets are reported at historical or estimated historical cost. Donated fixed assets are valued at estimated fair value on the date donated. Interest costs incurred during construction and infrastructure fixed assets (highways, bridges, etc.) are not capitalized. No depreciation is provided for general fixed assets.

Fixed assets in the enterprise and internal service funds are reported at cost. Interest costs incurred during construction at Bradley International Airport are capitalized as part of the assets. Depreciation of the fixed assets is determined using the straight-line method and is based upon the assets' estimated useful lives.

Fixed assets in the higher education funds are reported at cost. No depreciation is recorded on these fixed assets, except for the University of Connecticut's fixed assets. Depreciation of the fixed assets is determined using the straight-line method and is based on the assets' estimated useful lives.

Fixed assets of the component units are reported at cost. Depreciation of the fixed assets is determined using the straight-line method and is based upon the assets' estimated useful lives.

Food Stamps

Food stamps distributed to recipients during the year are recognized as both an expenditure and a revenue in the operating statement.

Securities Lending Transactions (see Note 4)

Assets, liabilities, income, and expenses arising from securities lending transactions of the Combined Investment Funds are allocated ratably to the pension and nonexpendable trust funds based on their equity in the Combined Investment Funds.

Deferred Revenues

This liability account represents:

- Cash received by the State before the State has a legal claim to it (e.g. grant monies received before the incurring of qualifying expenditures).
- Revenues considered measurable but not available during the current period.

In subsequent periods, when the State has a legal claim to the cash received, or when the revenues become available, the liability for deferred revenues is removed from the balance sheet and revenue is recognized.

Capital Appreciation Bonds

Capital appreciation (deep-discount) bonds issued by the State, unlike most bonds which pay interest semi-annually, do not pay interest until the maturity of the bonds. An investor who purchases a capital appreciation bond at its discounted price and holds it until maturity will receive an

amount which equals the initial purchase price plus an i. amount which has accrued over the life of the bond on a semiannual compounding basis. The net value of the Taxes bonds is accreted (the discount reduced), based on this semiannual compounding, over the life of the bonds. This deep-discount debt is reported in the general long-term debt account group at its net or accreted value rather than at face value.

Other Long-term Obligations

The portion of unfunded pension costs, workers' compensation claims, and accumulated compensated absences that is expected to be liquidated with available expendable financial resources is reported as an expenditure and a fund liability of the governmental and expendable trust funds that will pay it. The remaining portion that is not expected to be liquidated with available expendable financial resources is reported in the general long-term debt account group. In the proprietary funds, higher education funds, and component units such obligations are recorded as fund liabilities.

Vacation and sick policy is as follows. Employees hired on or before June 30, 1977, can accumulate up to a maximum of 120 vacation days. Employees hired after that date can accumulate up to a maximum of 60 days. Upon termination or death, the employee is entitled to be paid for the full amount of vacation days owed. No limit is placed on the number of sick days that an employee can accumulate. However, the employee is entitled to payment for accumulated sick time only upon retirement, or after ten years of service upon death, for an amount equal to one-fourth of his/her accrued sick leave up to a maximum payment equivalent to sixty days.

h. Fund Equity

Contributed Capital

The amount of permanent fund capital in the enterprise funds, internal service funds, and component units which is contributed by governments and others.

Reserved Retained Earnings

The portion of retained earnings in the enterprise funds and component units which is legally restricted for specific future use.

Reserved Fund Balances

The portion of fund balances in the governmental, fiduciary, and higher education fund types which is legally reserved for a specific future use or which is not available their equity in the Combined Investment Funds. for appropriation or expenditure.

Revenues, Expenditures, and Interfund Transactions

Certain tax revenues that accrue to the State are considered "available" if the payer incurs the obligation to the State before year-end and payment is received within sixty days after year-end (see Note 6).

Licenses, Permits, and Fees

These items are not susceptible to accrual and are recognized as revenues when the cash is collected.

Interest Rate Swap Agreements

The State has entered into interest rate swap agreements to modify interest rates on outstanding debt. Other than the net interest expenditures resulting from these agreements, no amounts are recorded in the financial statements (see Note 15).

Interfund Transactions

Interfund transactions are recorded as follows:

(1) Transfers which are from funds that are receiving revenues to funds in which the resources are to be expended are classified as operating transfers.

(2) Transactions that would be treated as revenues, expenditures or expenses if they involved organizations external to the State are treated similarly by the funds of the State.

(3) Reimbursements from one fund to another are treated as expenditures or expenses of the reimbursing fund and as a reduction of the expenditures or expenses of the reimbursed fund.

(4) Non-recurring or non-routine transfers of equity between funds and capital contributions to proprietary funds are classified as equity transfers.

j. Pension Trust Funds Transactions

Plan member contributions are recognized in the period in which the contributions are due. State contributions are recognized in the period in which the contributions are appropriated. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan. Investment income and related expenses of the Combined Investment Funds (including securities lending transactions) are allocated ratably to these funds based on

k. External Investment Pool Fund

Assets and liabilities of the Short-Term Investment Fund are allocated ratably to the External Investment Pool Fund based on its equity in the Short-Term Investment Fund (see Note 4). Pool income is determined based on distributions made to pool's participants.

I. Use of Estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

m. Total Columns - Memorandum Only

Total columns captioned "Memorandum Only" are presented only to facilitate financial analysis. Data in these columns do not present the financial position, the results of operations or cash flow in conformity with generally accepted accounting principles nor is such data comparable to a consolidation.

Note 2

BUDGETARY BASIS VS. GAAP

The following is a reconciliation of the excess (deficiency) of revenues and other sources over expenditures and other uses as accounted between the budgetary and GAAP basis of accounting (amounts in thousands):

Financial Statements Fund Types	General	Special <u>Revenue</u>
Excess (deficiency) of revenues and other sources over expenditures and other uses (Budgetary basis)	\$ 312,911	\$ 76,591
Adjustments:		
Increases (decreases) in revenue accruals:		
Government Receivables	(35,207)	3,604
Other Receivables	(35,762)	(4,631)
(Increases) decreases in expenditure accruals:		
Accounts Payable and Other Liabilities	60,597	(4,158)
Salaries and Fringe Benefits Payable	(6,533)	2,428
Increase (decrease) in Continuing		
Appropriations	180,520	28,395
Reclass of equity adjustments:		
To Other Financing Uses	(85,768)	-
To Operating Expenses		<u>(84,855</u>)
Excess (deficiency) of revenues and other sources over expenditures and other uses		
(GAAP basis) - budgeted funds	390,758	17,374
To record excess of revenues and other sources over expenditures and other uses		. •
for nonbudgeted funds	<u> </u>	<u> 19,897</u>
Excess (deficiency) of revenues and other sources over expenditures and other uses		
(GAAP basis)	<u>\$ 390.758</u>	<u>\$ 37,271</u>

Note 3

FUND DEFICITS

The following funds have deficit balances at June 30, 1998, in either unreserved fund balances or unreserved retained earnings, none of which constitutes a violation of statutory provisions (amounts in thousands).

General Fund	\$ 694,308
Special Revenue Consumer Counsel and Public Utility Control	\$ 3,163
Enterprise Funds Bradley International Airport	\$ 4,968

The General Fund and Consumer Counsel and Public Utility Control Fund deficits have been addressed by Public Act 93-402, subsequently modified by Public Act 97-305, which among other things, requires any GAAP deficits for budgeted funds existing as of June 30, 1999 to be amortized in fifteen equal increments beginning with the annual budget for fiscal year 2000-01.

While the unreserved retained earnings of Bradley has a deficit balance, the total fund equity of each fund is still positive.

Note 4

CASH DEPOSITS AND INVESTMENTS

In this note, the State's deposits and investments are classified in categories of "custodial credit risk." This is the risk that the State will not be able to (a) recover deposits if the depository bank fails or (b) recover the value of investments or collateral securities that are in the custody of an outside party if the counterparty to the investment or deposit transaction fails. Classification in category 1 means that the exposure of deposits or investments to potential custodial credit risk is low. The level of potential custodial credit risk is higher for those deposits or investments classified in category 2, and highest for those in category 3.

Cash deposits (amounts in million)

At June 30, 1998, the reported amount of the State's

deposits was \$(133.7) for the Primary Government and \$133.0 for the Component Units. The corresponding bank balance for such deposits was \$139.3 for the Primary Government and \$139.2 for the Component Units. Of the bank balance for the Primary Government \$52.6 was insured by the Federal Deposit Insurance Corporation or held by the State's agent in the State's name (Category 1), \$8.7 was collateralized (Category 3), and \$78.0 was uninsured and uncollateralized (Category 3). Of the bank balance for the Component Units, \$12.4 was insured by the Federal Deposit Insurance Corporation or held by the State's agent in the State's name (Category 1), \$0.9 was collateralized (Category 3), and \$125.9 was uninsured and uncollateralized (Category 3).

Collateralized deposits are deposits which are protected by State statute. Under the statute, any bank holding public deposits must at all times maintain eligible collateral in an amount equal to 10%, 25%, 100%, or 120% of its public deposits. The applicable percentage is determined based on the bank's risk-based capital ratio - a measure of the bank's financial condition. The collateral is kept in the custody of the trust department of either the pledging bank or another bank in the name of the pledging bank.

Investments

The State Treasurer is the chief fiscal officer of State government and is responsible for the prudent management and investment of monies of State funds and agencies as well as monies of pension and other trust funds. Investment policies and guidelines are established by the State Treasurer with the advice of the Investment Advisory Council, whose members include outside investment professionals and pension beneficiaries. Currently, the State Treasurer manages one Short-Term Investment Fund ("STIF") and seven Combined Investment Funds (the "CIFS"), including one international investment fund.

STIF is a money market investment pool in which the State, municipal entities, and political subdivisions of the State are eligible to invest. The State Treasurer is authorized to invest monies of STIF in United States government and agency obligations, certificates of deposit, commercial paper, corporate bonds, saving accounts, bankers' acceptances, repurchase agreements, assetbacked securities, and student loans. STIF's investments are reported at amortized cost (which approximates fair value) and are disclosed in the investments schedules.

For financial reporting purposes, STIF is considered to be a mixed investment pool - a pool having external and

internal portions. The external portion of STIF (i.e., the portion that belongs to participants which are not part of the State's financial reporting entity) is reported as an investment trust fund in the combined financial statements. The internal portion of STIF (i.e., the portion that belongs to participants that are part of the State's financial reporting entity) is not reported in the combined financial statements. Instead, each fund type's investment in the internal portion of STIF is reported as "cash equivalents" in the combined balance sheet.

The CIFS are open-end, unitized portfolios in which the State pension and other trust funds are eligible to invest. The units of the CIFS are owned by the State pension and other trust funds. The State Treasurer is also authorized to invest monies of the CIFS in common stock, commercial equity real estate, foreign companies stocks and bonds, commercial and residential mortgages, foreign governments obligations, mortgage-backed securities, and venture capital partnerships. CIFS' investments are reported at fair value and are disclosed in the investments schedules.

For financial reporting purposes, the CIFS are considered to be internal investment pools and are not reported in the combined financial statements. Instead, each fund type's investment in the CIFS is reported as "equity in combined investment funds" in the combined balance sheet.

Complete financial information about STIF and the CIFS can be obtained from financial statements issued by the State Treasurer.

The following investments schedules disclose the reported amount and fair value of the State's investments in total and by investment type as of June 30, 1998. Further, the reported amounts of these investments are classified according to the following categories of custodial credit risk. Category 1 includes investments that are insured or registered or for which the securities are held by the State or its agent in the State's name. Category 2 includes uninsured and unregistered investments for which the securities are held by the counterparty's trust department or agent in the State's name. Category 3 includes uninsured and unregistered investments for which the securities are held by the counterparty, or by its trust department or agency but not in the State's name.

The CIFS account for the purchase and sale of investments using "trade date" accounting - investments are increased or decreased on the date the purchase or sales order is made although the investments are not received or

delivered until a later date (settlement date). Thus, CIFS' investment schedule was prepared taking into account unsettled sales and purchases of investments. This means that investments under unsettled sales are included in the schedule, because the investments are still subject to custodial credit risk that could result in losses prior to settlement. Conversely, investments under unsettled purchases are excluded from the schedule, because the investments are still in the hands of the dealers.

Derivatives

GASB Technical Bulletin Number 94-1 defines derivatives as contracts whose value depends on, or derives from, the value of an underlying asset, reference rate, or index. According to this definition, the following State's investments or contracts are considered to be derivatives:

• Short-Term Investment Fund - Adjustable-rate corporate, federal agency, student loan-backed revolving loans, certificates of deposit, and State of Israel securities whose interest rates vary directly with short-term money market indices and are reset daily, monthly, quarterly, or semi-annually.

 Combined Investment Funds - Adjustable rate securities, asset backed securities, indexed Treasury securities, option contracts, collateralized mortgage obligations (CMOs), common stock, and foreign exchange contracts (CMOs are disclosed as mortgagebacked securities on the investments schedule).

The State invests in derivatives in order to increase earnings on investments or to hedge against fluctuations in the value of foreign currencies (as in the case of foreign exchange contracts).

The Mutual Fixed Income Fund (a Combined Investment Fund) invests in collateralized mortgage obligations (CMOs) and asset backed securities (ABSs). These are bonds issued by a special purpose trust that collects payments on an underlying collateral pool of mortgages or other loans and remits payments to bondholders. The bonds are structured in a series of classes or tranches, each with a different coupon rate and stated maturity date. Interest payments to the bondholders are made in accordance with the trust indentures and amounts received from borrowers in excess of interest payments and expenses are used to amortize the principal on the bonds. Such principal payments are made to retire the tranches of bonds in order of their stated maturity. Because mortgage prepayments are largely dependent on market interest rates, the ultimate maturity date of the bonds is unpredictable and is sensitive to changes in market interest rates, but is generally prior to the stated maturity date. At June 30, 1998, the fund held CMOs of \$610.9 million and ABSs of \$152.9 million.

The Commercial Mortgage Fund (a Combined Investment Fund) investments in common stock include a subordinated residual interest in a securitized portfolio of commercial mortgage loans (the CMO residual). The single class of related senior bonds has been paid in full during the year. As of June 30, 1998, the CMO residual had an estimated fair value of \$85.1 million.

Foreign exchange contracts are used to facilitate transactions in foreign securities and to manage the funds currency exposure. Contracts to buy are used to acquire exposure to foreign currencies, while contracts to sell are used to hedge the funds' investments against currency

fluctuations. Losses may arise from changes in the value of foreign currencies or failure of the counterparties to perform under the contracts' terms.

Security Lending Transactions

Certain of the Combined Investment Funds are permitted by State statute to lend its securities through a lending agent to authorized broker-dealers and banks for collateral with a simultaneous agreement to return the collateral for the same securities in the future.

During the year, the funds' lending agent lent securities similar to the types on loan at year-end and received cash (United States and foreign currency), securities issued or guaranteed by the United States government, sovereign debt rated A or better, convertible bonds, and irrevocable bank letters of credit as collateral. The funds' lending agent did not have the ability to pledge or sell collateral securities delivered absent a borrower default. Borrowers were required to deliver collateral for each loan equal to: (1) in the case of loaned securities denominated in United States dollars or whose primary trading market was located in the United States or sovereign debt issued by foreign governments, 102% of the market value of the loaned securities; and (2) in the case of loaned securities not denominated in United States dollars or whose primary trading market was not located in the United States, 105% of the market value of the loaned securities. In the event any borrower fails to return the loaned securities or pay distributions thereon, the funds' lending agent is contractually obligated to purchase replacement securities, or return the cash collateral. At year end, the funds had no credit exposure to borrowers because the amounts the funds owed the borrowers exceeded the amounts the borrowers owed the funds.

All securities loans can be terminated on demand by either the funds or the borrowers. Cash collateral is invested in the lending agent's investment collateral pool, which at year-end had a weighted average maturity of 35 days. The weighted average duration of the loans was unknown, although it is assumed to remain at one day. A percentage of the investment collateral pool is invested in overnight instruments and money market mutual funds to enable it to meet normal liquidity needs.

Note 5

LOANS

Loans receivable for the primary government and its component units, as of June 30, 1998, consisted of the following (amounts in thousands):

Primary Government										
Mattanga	Special <u>Revenue</u>	<u>Enterprise</u>	Trust and <u>Agency</u> \$-	Higher <u>Education</u>	<u>Total</u>	Component <u>Units</u>

The mortgage loan program consists of home, multi-family and construction loan mortgages made by the Connecticut Housing Finance Authority. Most home loans are insured by the Federal Housing Administration or guaranteed by the Veterans Administration. In addition, some home and multi-family loans are insured or guaranteed by private insurers. Permanent loans earn interest at rates ranging from 0% to 13.5% and have initial terms of 10 to 40 years. Construction loans earn interest at rates ranging from 0% to 10.88%. Upon completion of each development, the related permanent mortgage loan, which will generally be provided by the Authority, will be payable over 30 to 40 years at annual interest rates ranging from 0% to 10.38%.

The Clean Water fund loans funds to qualified municipalities for planning, design, and construction of water quality projects. These loans are payable over a 20 year period at an annual interest rate of 2% and are secured by the full faith and credit or revenue pledges of the municipalities, or both.

The industrial loan program consists of loans made by the Connecticut Development Authority to finance the purchase of land, buildings, and equipment by qualified applicants and to finance other economic development programs of the Authority. These loans are collateralized by assets acquired from the proceeds of the related loans. These receivables have originating terms of 1 to 25 years and earn interest at rates ranging from 3% to 12%. As of

June 30, 1998, loans in the amount of \$49.9 million (including loans of \$8.9 million made by other lending institutions) were insured by an insurance fund created by the Authority and by the faith and credit pledged by the State. This insurance fund had net assets of \$8.4 million at year end. Thus, the State is contingently liable in the event of any defaulted loans that could not be paid out of the assets of the insurance fund.

The following estimated useful lives are used to compute depreciation: Buildings 10-60 years; Land Improvements 2-50 years; Machinery and Equipment 2-21 years.

Note 9

STATE RETIREMENT SYSTEMS

The State sponsors three major public employee retirement systems: the State Employees' Retirement System (SERS) - consisting of Tier I (contributory), Tier II (noncontributory) and Tier IIA (contributory), the Teachers' Retirement System (TRS), and the Judicial Retirement System (JRS).

SERS and JRS are administered by the State Comptroller's Retirement Division under the direction of the Connecticut State Employees Retirement Division. TRS is administered by the Teachers' Retirement Board. None of the above mentioned systems issue stand-alone financial reports.

Plan Descriptions, Funding Policy, and Annual Pension Cost and Net Pension Obligation

Membership of each plan consisted of the following at the date of the latest actuarial evaluation:

	SERS <u>6/30/97</u>	TRS <u>6/30/96</u>	JRS 9/30/97
Retirees and beneficiaries

State Employees' Retirement System

Plan Description

SERS is a single-employer defined-benefit pension plan covering substantially all of the State full-time employees who are not eligible for another State sponsored retirement plan. Plan benefits, cost-of-living adjustments, contributions requirements of plan members and the State, and other plan provisions are described in Sections 5-152 to 5-192 of the General Statutes. The plan provides retirement, disability, and death benefits, and annual costof-living adjustments to plan members and their beneficiaries.

Funding Policy

The contribution requirements of plan members and the State are established and may be amended by the State

legislature. Tier I Plan B and Hazardous Duty members are required to contribute 2% and 4% respectively, of their salary up to the Social Security Taxable Wage Base plus 5% above that level; Tier I Plan C members are required to contribute 5% of their annual salary; Tier IIA members are required to contribute 2% and hazardous duty members are required to contribute 5%. The State is required to contribute at an actuarially determined rate. For fiscal year 1998, the annual required contribution (ARC) was \$567.6 million; however, in accordance with the provisions of collectively negotiated agreements, the State only contributed \$334.8 million (including federal and other reimbursements) to the plan. Administrative costs of the plan are funded by the State.

Teachers Retirement System

Plan Description

TRS is a single-employer defined-benefit pension plan covering any teacher, principal, superintendent or supervisor engaged in service of public schools in the State. Plan benefits, cost-of-living allowances, required contributions of plan members and the State, and other plan provisions are described in Sections 10-183b to 10-183nn of the General Statutes. The plan provides retirement, disability, and death benefits, and annual cost-ofliving adjustments to plan members and their beneficiaries.

Funding Policy

The contribution requirements of plan members and the State are established and may be amended by the State legislature. Plan members are required to contribute 6% of their annual salary. The State is required to contribute at an actuarially determined rate. For fiscal year 1998, the ARC was \$211.0 million; however, the State contributed \$179.4 million to the plan, reflecting a reduction of \$31.6 million by the legislature to the State's TRS appropriation. Administrative costs of the plan are funded by the State.

Judicial Retirement System

Plan Description

JRS is a single-employer defined-benefit pension plan covering any appointed judge or compensation commissioner in the State. Plan benefits, cost-of-living allowances, required contributions of plan members and the State, and other plan provisions are described in Sections 51-49 to 51-51 of the General Statutes. The plan provides retirement disability, and death benefits, and annual cost-of-living adjustments to plan members and their beneficiaries.

Funding Policy

The contribution requirements of plan members and the State are established and may be amended by the State legislature. Plan members are required to contribute 6% of their annual salary. The State is required to contribute at an actuarially determined rate. Administrative costs of the plan are funded by the State.

Annual Pension Cost, Net Pension Obligation, and Related Information

The State's annual pension cost and net pension obligation to SERS, TRS, and JRS for the current year were as follows (amounts in thousands):

		<u>SERS</u>	TRS	<u>JRS</u>
Annual required contribution Interest on net pension	\$	567,635	\$211,019	\$9,309
obligation		123,872	67,780	3

Defined Contribution Plan

The State also sponsors the Connecticut Alternate Retirement Program (CARP), a defined contribution plan. CARP is administered by the State Comptroller's Retirement Office under the direction of the Connecticut State Employees Retirement Division. Plan provisions, including contributions requirements of plan members and the State, are described in Section 5-156 of the General Statutes.

Unclassified employees at any of the units of the Connecticut State System of Higher Education are eligible to participate in the plan. Plan members are required to contribute 5% of their annual salaries. The State is required to contribute 8% of covered salary. During the year, plan members and the State contributed \$ 13,761.8 million and \$ 21,745.1 million, respectively.

Note 10

OTHER RETIREMENT SYSTEMS ADMINISTERED BY THE STATE

The State acts solely as the administrator and custodian of the assets of the Connecticut Municipal Employees' Retirement System (CMERS) and the Connecticut Probate Judges and Employees' Retirement System (CPJERS). Although these retirement systems are included as pension trust funds in the State's financial statements, the State makes no contribution and has no financial liability other than a fiduciary responsibility.

Plan Descriptions and Contribution Information

Membership of each plan consisted of the following at the date of the latest actuarial valuation:

	CMERS 6/30/97	CPJERS 12/31/97

to but not receiving benefits	97	33
Active plan members	7,560	<u>360</u>
 Total 	<u>11,720</u>	<u>578</u>
Number of participating employers	159	1

Connecticut Municipal Employees' Retirement System

Plan Description

CMERS is a cost-sharing multiple-employer defined benefit pension plan that covers fire, police, and other personnel (except teachers) of participating municipalities in the State. Plan benefits, cost-of-living adjustments, contribution requirements of plan members and participating municipalities, and other plan provisions are described in Chapters 7-425 to 7-451 of the General Statutes. The plan provides retirement, disability, and death benefits, and annual cost-of-living adjustments to plan members and their beneficiaries.

Contributions

Plan members are required to contribute 2.25% to 5.0% of their annual salary. Participating municipalities are required to contribute at an actuarial determined rate. Administrative costs of the plan are funded by the participating municipalities.

Connecticut Probate Judges and Employees' Retirement System

Plan Description

CPJERS is a single-employer defined benefit pension plan that covers judges and employees of probate courts in the State. Plan benefits, cost-of-living adjustments, required contributions of plan members and the probate court system, and other plan provisions are described in Chapters 45a-34 to 45a-56 of the General Statutes. The plan provides retirement, disability, and death benefits, and annual cost-of-living adjustments to plan members and their beneficiaries.

Contributions

Plan members are required to contribute 1.0% to 3.75% of their annual salary. The probate court system is required to contribute at an actuarial determined rate. Administrative costs of the plan are funded by the probate court system.

Note 11

DEFERRED COMPENSATION PLAN

The State of Connecticut offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan, available to all State employees in a permanent position, including elected and appointed officials and members of the General assembly, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until retirement, termination of employment, disability, unforeseeable emergency or death.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts and all income attributable to those amounts, property or rights are (until paid or made available to the employee or other beneficiary) solely the property and rights of the State (without being restricted to the provisions of benefits under the plan), subject only to the claims of the State's general creditors. Participants' rights under the plan are equal to those of general creditors of the State in an amount equal to the fair market value of the deferred account for each participant. At this time, the State believes that it is unlikely that it will use the assets of the plan to satisfy the claims of general creditors in the future.

Based on Article V of the State of Connecticut Deferred Compensation Plan, the State has no liability for losses under any employee selected plan. The State does have the duty of due care that would be of an ordinary prudent investor.

In 1996 Congress changed the provisions of IRC Section 457 to require that new plans will not be considered eligible deferred compensation plans unless all assets and income of the plans are held in trust for the benefit of the participants and their beneficiaries. For plans in existence at the time the law was changed, a trust will need to be established by January 1, 1999.

Note 12

POSTEMPLOYMENT BENEFITS

In addition to the pension benefits described in Note 9, the State provides postretirement health care and life insurance benefits, in accordance with State statutes, Sections 5-257(d) and 5-259(a), to all employees who retire from the State.

Currently 31,631 retirees meet those eligibility requirements. When employees retire, the State pays 100% of their health care insurance premium cost (including dependent's coverage). In addition, the State pays 100% of the premium cost for a portion of the employees' life insurance continued after retirement. The amount of life insurance, continued at no cost to the retiree, is determined based on the number of years of service that the retiree had with the State at time of retirement as follows: a) if the retiree had 25 years or more of service, the amount of insurance will be one-half of the amount of insurance for which the retiree was insured immediately prior to retirement, but the reduced amount cannot be less than \$7,500; (b) if the retiree had less than 25 years of service, the amount of insurance will be the proportionate amount that such years of service is to 25, rounded to the nearest \$100. The State finances the cost of postretirement health care and life insurance benefits on a pay-as-you-go basis through an appropriation in the General Fund.' During the year ended June 30, 1998, \$129.5 million was paid in postretirement benefits.

Contingent revenues for the year ended June 30, 1998, were \$1.6 million.

b. State as Lessee

Obligations under capital leases and operating leases as of June 30, 1998, were \$73.1 million for capital leases and \$80.2 million for noncancelable operating leases in excess of one year. The following is a schedule of annual future minimum payments under these obligations along with the present value of the related net minimum capital lease payments discounted at approximately 6% as of June 30, 1998 (amounts in thousands):

	Operating <u>Leases</u>	Capital Leases General Long-term
1999	\$21,730	\$ 8,507
2000	16,739	5,880
2001	11,346	4,981
2002	8,540	4,780
2003	5,922	4,098
Thereafter	<u> 15.946</u>	44,816
Total future minimum payments	<u>\$ 80,223</u>	73,062
Less: Imputed interest		24,844
Present value of net minimum	`	
lease payments		<u>\$ 48,218</u>

Rental and lease payments for equipment charged to expenditures during the year ended June 30, 1998, totaled \$ 41.3 million.

Note 13 CAPITAL AND OPERATING LEASES

a. State as Lessor

The State leases building space, land, and equipment to private individuals. The minimum future lease revenues for the next five years and thereafter are as follows (amounts in thousands):

1999	\$ 13,963
2000	14,952
2001	15,263
2002	15,354

The Combined Statement of Revenues, Expenditures and Changes in Fund Balances - All Governmental Fund Types reflects the net proceeds from the sale of bonds and notes in the amount of \$1,380.2 million. This amount includes discounts on the sale of certain bonds and premium and accrued interest received at the time of sale in the amount of \$24.5 million and non-cash proceeds of \$24.2 million of private placement bonds.

Additionally, \$951.7 million of issuances and other increases for general obligation bonds includes \$99.5 million of bonds issued by the University of Connecticut for which the State of Connecticut will pay the principal and interest.

Year Ending June 30,	Principal	Interest	Total
1999	\$78,055	\$2,829	\$80,884

General Obligation Bonds

General obligation bonds are those bonds that are paid out of the revenues of the General fund and that are supported by the full faith and credit of the State. General obligation bonds outstanding and bonds authorized but unissued at June 30 were as follows (amounts in thousands):

Note 15		Purpose
DEBT		Capital

Economic Recovery Notes

In November 1995, \$236.1 million of General Obligation Economic Recovery notes were issued to refinance \$240.7 million in notes which were due in 1995-96.

The economic recovery notes outstanding at June 30 were \$78.1 million. These notes mature on various dates through 1999 and bear original interest rates from 4.25% to 5%.

The following is a description of the future amounts (in thousands) needed to pay principal and interest on economic recovery notes outstanding at June 30, 1998.

Purpose of Bonds	Final Maturity <u>Dates</u>	Original Interest <u>Rates</u>	Amount <u>Outstanding</u>	Authorized But <u>Unissued</u>
Capital Improvements	1998-2018	3.4-9.875%	\$ 1,862,635	\$ 387,925

Total	<u>\$ 6.115.749</u>	<u>\$ 3,348.061</u>	<u>\$ 9,463,810</u>	

Transportation Related Bonds

Transportation related bonds include special tax obligation bonds and general obligation bonds that are paid out of revenues pledged or earned in the Transportation Fund. The revenue pledged or earned in the Transportation Fund to pay special tax obligation bonds is transferred to the debt service fund for retirement of principal and interest.

Transportation related bonds outstanding and bonds authorized but unissued at June 30 were as follows (amounts in thousands):

Purpose of Bonds Transportation	Final Maturity <u>Dates</u> 1998-1999	Original Interest <u>Rates</u> 6.60-6.70%	Amount <u>Qutstanding</u> \$ 10,000	Authorized But <u>Unissued</u> \$ 3

Demand Bonds

Included in general obligation bonds, there are variable rate demand bonds in the amount of \$100 million. The bonds were issued in May 1997 to fund various State programs (e.g., community conservation development, economic development and manufacturing assistance, regional economic development, etc.) and will mature in the year 2014. Starting in the year 2005, the bonds will be subject to mandatory annual redemption in the principal amount of \$10 million plus accrued interest (these amounts are included in the debt service schedule). Concerning the issuance of the bonds, the State signed various agreements, including a "Remarketing Agreement" with a broker/dealer firm and a "Standby Bond Purchase Agreement" with a foreign bank.

The bonds bear interest at a weekly rate or at a flexible rate for a flexible rate period, which cannot be longer than 270 days. Initially, all bonds bear interest at the weekly rate. After that, the bonds may be converted from time to time to the flexible rate or weekly rate at the option of the State. The State's remarketing agent determines the weekly or flexible rate and applicable flexible rate period.

Bonds bearing interest at the weekly rate are subject to purchase at the option of the holder at a purchase price equal to principal and accrued interest, if any, on a minimum seven days' notice and delivery to the State's agent. In addition, all bonds are subject to mandatory purchase upon (1) conversion from the weekly rate to the flexible rate or vice versa, (2) the end of each flexible rate period, and (3) expiration or substitution of the Standby Bond Purchase Agreement. The State's remarketing agent is responsible for using its best efforts to remarket bonds properly tendered for purchase.

The Standby Bond Purchase Agreement requires the bank to purchase bonds tendered and not remarketed in an amount not to exceed the principal on the bonds plus (for bonds bearing interest at the weekly rate) accrued interest up to 35 days at an annual interest rate not to exceed 15%. Bonds purchased by the bank will bear an interest rate initially equal to (1) for bonds held for up to 30 days after the purchase date, the Federal funds rate plus .50%; (2) for bonds held for more than 30 days but less than 90 days after the purchase date, the Federal rate plus 1.00%; and (3) for bonds held for more than 90 days after the purchase date, the higher of (a) the base commercial lending rate announced from time to time by the bank, or (b) the Federal funds rate plus .50%.

The State is required under the Standby Bond Purchase

Agreement to pay to the bank a quarterly fee of .065% per annum of the available commitment as of each payment date. The available commitment is an amount equal to the sum of the bond principal and accrued interest that the bank is committed to purchase under the agreement. Such amount was initially set in the agreement at \$101.4 million and is adjusted from time to time according to provisions in the agreement. If the rating on the bonds were to fall below certain levels, or be withdrawn or suspended, the bank fee could go as high as .135% per annum.

The Standby Bond Purchase Agreement expires in the year 2002 and could be extended annually for another year. If certain events of default described in the agreement were to occur, the agreement could be terminated prior to that date.

Expendable Trust Fund Obligations

In July, August, and September 1993, the State issued \$1,020.7 million of Special Assessment Unemployment Compensation Advance Fund revenue bonds. The issuance of these special obligation revenue bonds was for the purpose of repaying loans made by the United States Connecticut for payment of unemployment to compensation benefits and assisting the State in meeting a portion of its unemployment compensation benefit obligations until increased employer assessments are levied. These bonds mature on various dates through 2001 and bear interest rates from 3.1% to 5.5% and shall be payable solely from the Unemployment Compensation Advance Fund and revenues and requisitional funds specifically pledged for their payment.

The State has no contingent obligation either directly or indirectly with the payment of these bonds.

Future amounts (in thousands) needed to pay principal and interest on special assessment unemployment compensation bonds were as follows:

Year Ending June 30	<u>Principal</u>	Interest	<u>Total</u>
1999	\$ 115,000	\$ 29,949	\$ 144,949
2000	143,270	24,827	168,097
2001	150,265	16,898	167,163
2002	281,220	5,541	286,761
Total	<u>\$ 689.755</u>	<u>\$ 77,215</u>	<u>\$ 766,970</u>

On November 1996, the State issued \$100 million of Second Injury Fund special assessment revenue bonds.

The bonds were issued to reduce long-term liabilities of the fund by settling claims on a one-time lump sum basis. The bonds bear fixed interest rates ranging from 4.25% to 6.00% and mature each year at various amounts through the year 2012, starting on January 1 of 1998. Because the bonds will be paid solely from future assessment revenue of the fund, the State has no contingent obligation either directly or indirectly for the payment of such bonds.

Future amounts (in thousands) needed to pay principal and interest on Second Injury Fund special assessment revenue bonds were as follows:

Year Ending June 30	Principal	Interest	Total
1999	\$ 4,880	\$ 4,989	\$ 9,869
2000	5,100	4,769	9,869
2001	5,330	4,540	9,870
2002	5,595	4,273	9,868
2003	5,875	3,994	9,869
Thereafter	69.280	19.520	
Total	<u>\$.96,060</u>	<u>\$ 42,085</u>	<u>\$ 138,145</u>

Additionally, the bond indenture allows for the periodic issuance of subordinated Bond Anticipation Notes (BANs) in the form of commercial paper. As of June 30, 1998, the fund had \$90 million in outstanding BANs. The State intends on replacing these BANs with long-term bonds in 1999, and has entered into a Revolving Credit Agreement that ensures that the BANs can be refinanced on a longterm basis.

Interest Rate Swap Agreements

The State has entered into interest rate swap agreements for the following outstanding debt:

Туре	<u>Face Value</u>	Interest	Maturity
	(000's)	<u>Rate</u>	<u>Date</u>
Transportation - STO's	\$201,100	variable	2010

Based on these agreements, the State pays a fixed interest rate to the counterparty to the swap, and the counterparty pays the State a variable interest rate that is determined by the agreement. The State continues to make payments to the bondholders, and only the net difference in interest payments is exchanged with the counterparty. By entering into these agreements, the State has in effect exchanged its variable rate liability for a fixed rate obligation.

The agreements call for the following exchange of interest rates:

<u>Counterparty</u>	<u>Face Value</u> (000's)	Interest Rate Assumed by <u>State</u>	Interest Rate Assumed by <u>Counterparty</u>
AIG Corp.	\$ 120,700	5.75%	65% of 1 - month LIBOR* rate
Sumitomo Bank	\$ 80,400	5.70%	65% of 1 - month LIBOR* rate

* The primary fixed income index reference rates used in the Euromarkets. Most international floating rates are quoted as LIBOR plus or minus spread.

Regarding these agreements, the State is exposed to the market risk relating to the relationship between the variable interest rate on the bonds (which is reset weekly) and the rate that it receives under the swap agreements (which is 65% of 1-month LIBOR).

Both agreements are guaranteed by the counterparties, and the agreement with AIG Corp. has a collateral agreement which goes into effect if the credit rating of AIG falls below a defined level.

Revenue Bonds

Revenue bonds are those bonds that are paid out of a) resources pledged in the enterprise funds, nonexpendable trust funds, higher education funds, and component units. Revenue bonds outstanding at June 30 were as follows:

· · · · · • • • • • • • • • • • • • • •	Maturity	Interest	Amounts

		Total <u>\$.6,439.079</u>

Revenue bonds issued by the component units do not constitute a liability or debt of the State, and the State is only contingently liable for these bonds as discussed in this section.

The following is a description of revenue bonds with restrictive covenants:

Primary Government:

Bradley International Airport's revenue bonds were issued in 1982 in the amount of \$100 million to finance costs of improvements to the airport. As of June 30, 1998, the following bonds were outstanding:

- a) Airport revenue refunding bonds in the amount of \$81.3 million. These bonds were issued in October, 1992, to redeem the 1982 revenue bonds, and are secured by and payable solely from the gross operating revenues generated by the State from the operations of the airport and other receipts, funds or monies pledged in the bond indenture. In accordance with this indenture, certain assets of this fund have been restricted for the payment of bond principal and interest, construction projects and other uses.
- b) Airport subordinated refunding bonds in the amount of \$3.4 million. These bonds were issued in 1989 to help pay for certain expenses (e.g. issuance costs, redemption premium) incurred in the issuance of the 1992 refunding bonds.

In 1994, the State of Connecticut issued Clean Water Fund revenue bonds in the amount of \$325.2 million. The proceeds of these bonds are to be used to provide funds to make loans to Connecticut municipalities for use in connection with the financing or refinancing of waste water treatment projects.

Component Units

Connecticut Development Authority's revenue bonds are issued to finance such projects as the acquisition of land or the construction of buildings, and purchase and installation of machinery, equipment, and pollution control facilities. The Authority finances these projects through its Self-Sustaining Bond Program and Umbrella Program. Under the Umbrella Program, bonds outstanding at June 30, 1998, were \$65.7 million. Assets totaling \$69.6 million are pledged under the terms of the bond resolution for the payment of principal and interest on these bonds until such time as it is determined that there are surplus funds as defined in the bond resolution. Bonds issued under the Self-Sustaining Bond Program are discussed in the no-commitment debt section. In addition, the Authority had \$59.1 million in general obligation bonds outstanding at year end. These bonds were issued to finance the lease of an entertainment/sports facility, the purchase of a hockey team, and the construction of a music amphitheatre.

Connecticut Housing Finance Authority's revenue bonds are issued to finance the purchase, development and construction of housing for low and moderate income families and persons throughout the State. According to the bond resolution, the following assets of the Authority are pledged for the payment of the bond principal and interest (1) the proceeds from the sale of bonds, (2) all mortgage repayments with respect to long-term mortgage and construction loans financed from the Authority's general fund, and (3) all monies and securities of the Authority's general and capital reserve funds. The capital reserve fund is required to be maintained at an amount at least equal to the amount of principal, sinking fund installments, and interest maturing and becoming due in the next succeeding calendar year (\$304 million at 12/31/97) on all outstanding bonds. In addition, all assets of the Authority's general and capital reserve funds (\$3,397 million) are restricted until such time as they are determined to be "surplus funds."

Connecticut Resources Recovery Authority's revenue bonds are issued to finance the design, development and construction of resources recovery and recycling facilities and landfills throughout the State. These bonds are paid solely from the revenues generated from the operations of the projects and other receipts, accounts and monies pledged in the bond indentures.

Connecticut Higher Education Supplemental Loan Authority's revenue bonds are issued to provide loans to students, their parents, and institutions of higher education to assist in the financing of the cost of higher education. These loans are issued through the Authority's Bond fund. According to the bond resolutions, the Authority internally accounts for each bond issue in separate funds, and additionally, the Bond fund includes individual funds and accounts as defined by each bond resolution.

Connecticut Health and Educational Facilities Authority's revenue bonds are issued to assist certain health care institutions, institutions of higher education, and qualified for-profit and not-for-profit institutions in the financing and refinancing of projects to be undertaken in relation to programs for these institutions. The Authority generally holds title to, or has first mortgages on, the buildings and related facilities financed by the bonds. The terms of the lease, mortgage and loan payments receivable from the institutions correspond to the amortization requirements of related bonds payable. On final payment of a bond issue, the title to or security interest in the building and related facilities reverts to the institution. Prior to July 1, 1979, the Authority issued general obligation bonds for which the Authority is ultimately responsible for the payment of principal and interest when due. After July 1, 1979, the Authority has issued only special obligation bonds for which the principal and interest is payable solely from the revenues of the institutions. At year end, the Authority had \$9.4 million and \$2,818.9 million in outstanding general obligation and special obligation bonds, respectively.

Each Authority has established special capital reserve funds which secure all the outstanding bonds of the Authority at year end (except as discussed below). These funds are usually maintained at an amount equal to next year's bond debt service requirements. The State may be contingently liable to restore any deficiencies that may exist in the funds in any one year in the event that the Authority is unable to do so. For the Connecticut Resources Recovery Authority and the Connecticut Health and Educational Facilities Authority, bonds outstanding at year end in the amount of \$276.5 million and \$313.5 million, respectively, were secured by the special capital reserve funds.

At June 30, 1998, two Connecticut Health and Educational Facilities Authority bond issues totaling \$59.9 million and secured by the special capital reserve funds were in default under their respective loan agreements. It is unknown at this time what the loss to the State will be as a result of the defaults. However, during the year the State advanced \$4.0 million to the Authority to replenish the special capital reserve funds.

Future amounts (in thousands) required to pay principal and interest on revenue bonds outstanding at June 30, 1998, were as follows:

			Primary G	overnment				
Year Ending June 30	Enterpris Principal	se Funds Interest	<u>Nonexpend</u> Principal	lable Trust Interest	<u>Higher Educ</u> Principal	cation Funds Interest	<u>Compone</u> Principal	ent Units Interest
1999	\$ 13,660	\$ 9,950	\$ 21,705	\$ 12,772	\$ 6,725	\$ 6,604	\$ 190,787	\$ 343,211

	<u>\$ 197.841</u>	<u>\$ 79,648</u>	<u>\$ 464.300</u>	<u>\$ 243.626</u>	<u>\$ 128.724</u>	<u>\$ 115.637</u>	<u>\$6,470,409</u>	<u>\$4.878.815</u>

No-commitment Debt

Under the Self-Sustaining Bond Program, the Connecticut Development Authority issues revenue bonds to finance such projects as described previously in the component units section. These bonds are paid solely from payments received from participating companies (or from proceeds of sale of the specific projects in the event of default) and do not constitute a debt or liability of the Authority or the State. Thus, the balances and activity of the Self-Sustaining Bond Program are not included in the Authority's financial statements. Total bonds issued at June 30, 1998 were \$134.5 million.

The Connecticut Resources Recovery Authority has issued several bonds to fund the construction of waste processing facilities by independent contractors/operators. These bonds are payable from a pledge of revenues derived primarily under lease or loan agreements between the Authority and the operators. Certain of these bonds are secured by letters of credit. The Authority does not become involved in the construction activities or the repayment of the debt (other than the portion allocable to Authority purposes). In the event of default, payment of the debt is not guaranteed by the Authority or the State except for the State's contingent liability discussed below. Thus, the assets and liabilities related to these bond issues are not included in the Authority's financial statements. Total bonds outstanding at June 30, 1998 were \$320.7 million bearing interest rates ranging from 3.8% to 8.625%. Of this amount, \$163.6 million was secured by a special capital reserve fund. The State may be contingently liable for any deficiencies in the fund as explained previously in the component units section.

Debt Refundings

During the year, the State advance refunded the following bonds (amounts in million).

Refunded <u>Bonds</u>	Average Interest <u>Rate</u>	Bond Type	Refunding <u>Bonds Issued</u>	Average Interest <u>Rate</u>
\$ 262.6	5.97%	General Obligation	\$ 273.6	5.19%
\$ 258.9	6.05%	Special Tax Obligation	\$ 262.9	5.28%

The proceeds of the refunding bonds were used to purchase U.S. Government securities, which were deposited in an irrevocable trust with an escrow agent to provide for all future payments on the refunded bonds. Thus, the refunded bonds are considered to be defeased and the liability for those bonds has been removed from the general long-term debt account group.

The State advance refunded these bonds to reduce its total debt service payments over the next fifteen years by \$29.1million and to obtain an economic gain (difference between the present values of the debt service payments of the old and new bonds) of \$22.1 million. As of June 30, 1998, \$2,140.7 million of outstanding general obligation, special tax obligation, and revenue bonds (including prior year's refundings) are considered defeased.

Note Payable

An installment note for \$12.3 million to acquire a telecommunication system was established between the University of Connecticut and Connecticut Bank and Trust Co. in 1988 with an interest rate of 7.55% and final

maturity in April 1999. Future amounts (in thousands) required to pay principal and interest on the note outstanding were as follows:

Year Ending June 30,	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
1999	\$ 1,608	\$48	\$ 1,656

Note 16

RISK MANAGEMENT

The risk financing and insurance program of the State is managed by the State Insurance Purchasing Board. The Board is responsible mainly for determining the method by which the State shall insure itself against losses by the purchase of insurance to obtain the broadest coverage at the most reasonable cost, determining whether deductible provisions should be included in the insurance contract, and whenever appropriate determining whether the State shall act as self-insurer. The schedule below lists the risks of loss to which the State is exposed and the ways in which the State finances those risks.

	Risk Financed	by
Risk of Loss	Purchase of <u>Commercial Insurance</u>	Self- <u>Insurance</u>
Liability (Torts):		
General (State buildings	,	
parks, or grounds)		x
Other	Х	
Theft of, damage to, or		
destruction of assets	Х	
Business interruptions	х	
Errors or omissions:		
Professional liability	х	
Medical malpractice		
(University Hospital)		х
Injuries to employees		X
Natural disasters	Х	

For the general liability risk, the State is self-insured because it has sovereign immunity. This means that the State cannot be sued for liability without its permission. For other liability risks, the State purchases commercial insurance only if the State can be held liable under a particular statute (e.g. per statute the State can be held liable for injuries suffered by a person on a defective State highway), or if it is required by a contract.

For the risk of, theft of, damage to, or destruction of assets (particularly in the automobile fleet), the State insures only leased cars and vehicles valued at more than \$100 thousand.

When purchasing commercial insurance, the State may retain some of the risk by assuming a deductible or self-insured retention amount in the insurance policy. This amount varies greatly because the State carries a large number of insurance policies covering various risks. The highest deductible or selfinsured retention amount assumed by the State is \$25 million, which is carried in a railroad liability policy.

For the last three fiscal years, the amount of settlements did not materially exceed insurance coverage.

Most State employees and retirees participate in three health plans. For one of these plans, the State is selfinsured. This plan is administered by an outside vendor which is responsible for the processing and payment of claims. As of June 30, 1998, claims incurred by the plan exceeded claims paid by the plan by \$47.4 million.

The State records its risk management activities in the General fund, except for activities related to the medical malpractice risk which are recorded in the John Dempsey Hospital fund. At year end, a liability for unpaid claims is recorded in each fund when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. The liability is determined based on the ultimate cost of settling the claims, including an amount for claims that have been incurred but not reported and claim adjustment expenses. The liabilities for medical malpractice and for workers' compensation are actuarially determined. The liability for medical malpractice is reported at its present value, using a discount rate of 5%. The portion of the General fund liability considered to be long-term is recorded in the General Long-Term Debt account group. Changes in the claims liability accounts during the last two fiscal years were as follows (amounts in thousands):

	General <u>Liability</u>	Medical <u>Malpractice*</u>	Workers' <u>Compensation</u>	Health <u>Plan</u>
Balance 6-30-96 Incurred claims	\$683 1,859	\$ 9,064 -	\$ 268,150 58,391	\$ 26,333 282,632
Paid claims	<u>(683</u>)	<u>(276</u>)	(43,766)	(248,643)
Balance 6-30-97	1,859	8,788	282,775	60,322
Incurred claims	64	-	40,330	271,610
Paid claims	<u>(1,859</u>)	<u>(354</u>)	<u>(44,178</u>)	<u>(284,522</u>)
Balance 6-30-98	<u>\$64</u>	<u>\$ 8,434</u>	<u>\$ 278,927</u>	<u>\$ 47.410</u>

⁶ Changes in the liability account are for fiscal years ending on 9-30-96 and 9-30-97.

Note 17

INTERFUND RECEIVABLES AND PAYABLES

Interfund receivable and payable balances at June 30, 1998, were as follows (amounts in thousands):

Fund	Interfund <u>Receivables</u>	Interfund <u>Payables</u>
General	<u>\$ 18,222</u>	<u>\$ 70,325</u>

	91,631	59,961
Totals	\$271,230	\$275,059

As of June 30, 1998, interfund payables exceeded interfund receivables by \$3.8 million; and residual equity transfer in exceeded residual equity transfer out by \$212 thousand. These differences were caused by the different reporting period used by John Dempsey Hospital, which is 9-30-97.

Note 18

RESTATEMENT OF FUND BALANCES/RETAINED EARNINGS/NET ASSETS AND CHANGE IN ACCOUNTING ESTIMATE

As of June 30, 1998, the beginning fund balances/retained earnings/net assets for the following funds were restated as follows (amounts in thousands):

Fund	Balance 6-30-97 Previously <u>Reported</u>		GASB Statement <u>No. 31</u>		Balance 6-30-97 as
Special Revenue:					
Environmental				_	
Programs \$	148,142	\$ (1,153)	\$-	\$ - .	\$ 146,989
Enterprise:					
Rental Housing	35,373	-	2,835	4,589	42,79
Expendable Trust	<u>:</u>				
Other	1,770	544	1,014	- `	3,328
Nonexpendable T	rust:				^
Other	23,813	581	1,351	-	25,74
Investment Trust: External Invest-					
ment Pool	-	-	691,788	· -	691,78
Higher Education	:		•		
Unrestricted	60, 8 6 I	-	-	(2,894)	57,96
Restricted	29,863	· ,-	-	967	30,83
Endowment	14,444	-	1,449	-	15,893
Loan	30,088	•	-	[,] 49	30,13
Plant	1,693,882			(224,917)	1,468,96

As part of implementing GASB Statement No. 31 (see Note 1a), the State reported certain fund's investments at fair value, which were reported at cost or amortized cost in prior years. The State also added a new fund to its financial reporting entity, the external investment pool fund (an investment trust fund).

As of June 30, 1998, the University of Connecticut recorded depreciation in its Plant funds. The cumulative effect of implementing this accounting change (\$215 million) is reported as a restatement of beginning fund balance.

For the year ended June 30, 1988, the State universities calculated the liability for accrued compensated absences based on salary rates in effect as of the balance sheet date. In previous years, the liability was calculated based on certain factors and assumptions including salary rate increases, vesting provisions, discount rate and other assumptions related to employee age and probability of cash settlement. The cumulative effect of this change in accounting estimate (11.2 million) is reported as a decrease in fund balance in the combined statements of changes in fund balances and current funds revenues, expenditures, and other changes.

Note 19

RESERVED RETAINED EARNINGS, RESERVED FUND BALANCES, AND CONTRIBUTED CAPITAL

Reserved Retained Earnings

Bradley International Airport, an enterprise fund, has \$29.5 million restricted for debt service requirements and other programs of the airport. The Connecticut Lottery Corporation, an enterprise fund, has \$9 thousand restricted for programs of the Corporation. The Connecticut Housing Finance Authority, a component unit, has \$390 million restricted for debt service requirements and other programs of the Authority. The Connecticut Resources Recovery Authority, a component unit, has \$17.5 million restricted for specific purposes.

Contributed Capital

The following is a summary of changes in the contributed capital accounts for the year ended June 30, 1998 (amounts in thousands):

<u>Pr</u>	<u>imary Government</u>	<u>Compone</u> Connecticut	ent Units
	Bradley International <u>Airport</u>	Resources Recovery <u>Authority</u>	Connecticut Innovations, Incorporated
Balance July 1, 1997	\$ 101,361	\$ 2,108	\$ 75,451
Contributions	393	-	2,325
Items added back to			
retained earnings	-	(147)	-
Adjustments	<u> </u>	<u> </u>	
Balance June 30, 1998	<u>\$ 101,754</u>	<u>\$ 1.961</u>	<u>\$ 77,776</u>

Reserved Fund Balances

These balances are comprised as follows (amounts in thousands):

Fund Type								
Reserved For	<u>General</u>	Special <u>Revenue</u>	Debt <u>Service</u>	Trust and Agency	Higher <u>Education</u>			
Petty Cash	\$ 1,052	\$-	s -	s 5 -	\$ -			
Budget								
Reserve	498,604	-	-	-	-			
Inventories	34,291	11,730	-	-	-			
Continuing								
Appropriations	372,339	49,885	-	-	-

Note 22

RELATED ORGANIZATIONS

Related organizations are legally separate organizations which are not financially accountable to the State. However, these organizations are still related to the State as discussed next.

The State appoints a voting majority of the following organizations' governing boards, the Community Economic Development Fund and the Connecticut Student Loan Foundation. The State's accountability for these organizations does not extend beyond making the appointments. As of June 30, 1998, the Connecticut Student Loan Foundation owed the State \$18.2 million under a revolving loan agreement.

Note 23

COMMITMENTS AND CONTINGENCIES

A. Commitments

At June 30, 1998, the State, including its component units, had the following outstanding commitments:

 Infrastructure (highways, roads, etc.) and other construction contracts and miscellaneous contracts with various vendors totaling approximately \$1,316 million of which \$750.6 million is expected to be reimbursed by Federal grants.

- School construction and alteration grants with various towns for \$887.3 million and interest costs of \$347.3 million for a total of \$1,234.6 million. Funding for these projects is expected to come from bond sales.
- Loan commitments, mortgage and grant programs, and loan guarantees totaling approximately \$372.7 million. Funding for these programs is expected to come from bond sales.

B. Contingent Liabilities

The Legislature has enacted legislation to assist the City of West Haven by authorizing the State to guarantee debt issued by the City in an amount up to \$35 million. At year end, the debt outstanding guaranteed by the State was \$21 million.

The State has entered into a contractual agreement with H.N.S. Management Company, Inc. and ATE Management and Service Company, Inc. to manage and operate the bus transportation system for the State. The State shall pay all expenses of the system including all past, present and future pension plan liabilities of the personnel employed by the system and any other fees as agreed upon. When the agreement is terminated the State shall assume or make arrangements for the assumption of all the existing obligations of the management companies including but not limited to all past, present and future

pension plan liabilities and obligations.

C. Litigation

The State, its units and employees are parties to numerous legal proceedings many of which normally occur in governmental operations. Most of these legal proceedings are not, in the opinion of the Attorney General, likely to have a material adverse impact on the State's financial position.

There are, however, several legal proceedings which, if decided adversely against the State, may require the State to make material future expenditures for expanded services or capital facilities or may impair future revenue sources. It is neither possible to determine the outcome of these proceedings nor to estimate the possible effects adverse decisions may have on the future expenditures or revenue sources of the State.

Note 24

SUBSEQUENT EVENTS

In July, \$185.4 million of general obligation bonds were issued. \$105.4 million were issued for the purpose of advance refunding and will mature at various dates through 2008, and bearing interest rates of 5.65% to 6.14%.

Also, \$80 million which were originally issued in 1996 with variable interest rates were converted to fixed rates. These bonds mature at various dates though 2006 and bear interest rates of 5.65% to 6.12%.

In September, \$225 million of special tax obligation bonds for transportation infrastructure programs were issued. These bonds mature on various dates though 2018 and bear interest rates of 4.0% to 5.5%.

In October, \$230 million of general obligation bonds were issued, maturing at various dates through 2018 and having interest rates of 3.40% to 5.25%.

In December, the Treasurer determined that two nursing homes which were in receivership and had defaulted on their loan payments to the Connecticut Health and Educational Facilities Authority (CHEFA) were not likely to generate sufficient revenue to make scheduled principal and interest payments on \$59.2 million of CHEFA's

outstanding revenue bonds. Since these bonds are secured by special capital reserve funds, the Treasurer has made a determination to treat the State's obligation to fund the special capital reserve funds over the term of the Bonds as debt for purposes of calculating the debt limit of the State. As a result, the obligation to pay debt service on such Bonds is reclassified as a direct long term debt obligation of the State in fiscal year 1999. The State intends to defease the Bonds from amounts reserved for debt retirement from the June 30, 1998 unappropriated surplus.

Note 25

YEAR 2000 ISSUE

The year 2000 issue is the result of shortcomings in many electronic data processing systems and other electronic equipment that may adversely affect the government's operations as early as fiscal year 1999.

The State of Connecticut has completed an inventory of computer systems and other electronic equipment that may be affected by the year 2000 issue and that are necessary to conducting State operations. The State has identified fifty top priority systems requiring year 2000 remediation. Contracts totaling \$3.9 million have been issued as of June 30, 1998. The fifty systems identified have been grouped in the following table.

SYSTEMS	Aware	ness	Assess	ment	Remed	iation	Validat Testing	
In Process/Completed	IP	C	IP	С	IP	C	IP	C
Central accounting, payroll and retirement systems		x		x		x	x	
Other financial reporting and tax collection		x		x	х		х	
Legal and administrative systems		x		x	х		x	
Regulatory and protective systems		x		x	x		x	
Social service and child welfare systems		x		x		x	. X	
Educational systems		x		x	x		x	
Judicial systems		X		x	X		X	
Public health systems		x		x	x		x	
Inmate management systems		x		x		x	x	
Construction Management Systems		x		x		x	x	
Clinical information systems		x		x	x		x	

Because of the unprecedented nature of the year 2000 issue, its effects and the success of related remediation efforts will not be fully determinable until the year 2000 and thereafter. Management cannot assure that the State is or will be year 2000 ready, that the State's remediation efforts will be successful in whole or in part, or that parties with whom the State does business will be year 2000 ready.

STATE OF CONNECTICUT Capital Projects Funds

Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities and infrastructure (other than those financed by proprietary funds, trust funds, and higher education funds). Significant Capital Projects Funds are described as follows:

State Facilities:

to account for proceeds of bond issues and other to account for the proceeds of bond issues and construction of various state buildings and related capital projects. structures.

Infrastructure:

to account for the proceeds of bond issues and related capital project grants to finance the State's transportation infrastructure program over a ten-year period. This program encompasses the planning, acquisition, removal, construction, equipping, reconstruction, repair, rehabilitation and improvement of, and acquisition of easements and rights-of-way with respect to, State highways and bridges, projects on the interstate highway system, alternate highway projects in the interstate substitution program (the "interstate trade-in program"), waterway facilities, aeronautic facilities (excluding Bradley International Airport), the highway safety program, maintenance garages and administrative facilities of the Department, payment of the State's share of the costs of the local bridge program and payment of State contributions to the local bridge revolving fund.

Other Transportation:

sources and the subsequent expenditures for the related grants to be used for other transportation

STATE OF CONNECTICUT Enterprise Funds

Enterprise Funds are used to account for operations (a) that are financed and operated in a manner similar to private business enterprises - where the intent of the governing body is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes. Significant Enterprise Funds of the State of Connecticut are described as follows:

93

Rental Housing Fund:

The Rental Housing Fund is used to account for the financing of various housing programs offered by the State from bond proceeds and the retirement of such obligations. Revenue is received from interest earned on program loans and investment income.

Bradley International Airport:

The airport is owned by the State of Connecticut and is operated by the Bureau of Aeronautics of the State of Connecticut, Department of Transportation. In 1982, the State issued the Airport, 1982 series, Revenue Bonds in the aggregate principal amount of \$100,000,000. The bonds were refunded in 1992 with the issuance of \$94,065,000 in refunding bonds. The refunding bonds are secured by and payable solely from the gross operating revenues generated by the State from the operations of the Airport and other receipts, funds or monies pledged in the Indenture.

John Dempsey Hospital:

Accounts for the assets, liabilities, revenues and expenses of the Hospital including the Dental Clinics and the Thames River Campus. The Governor appoints the Board of Trustees of the University of Connecticut Health Center, including the Hospital. The Hospital's fiscal year is for the period ending September 30, 1997.

The Connecticut Lottery Corporation:

The Connecticut Lottery Corporation, a public instrumentality and political subdivision of the State of Connecticut was created on July 1, 1996 for the purpose of generating revenues for the State of Connecticut's General Fund through the operation of a lottery.

STATE OF CONNECTICUT Internal Service Funds

Internal Service Funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the State, or to other governments, on a cost-reimbursement basis. The following operations are included in these funds:

Correction Industries:

to account for the revenues and expenses associated with the sale of goods resulting from the industrial activities of the inmates at correctional institutions.

Administrative Services:

to account for the various activities of the Department of Administrative Services including the purchasing of supplies and data processing equipment for the State, the operations of the motor pool, the operations of data processing services and certain other activities. Revenues consist of user charges to agencies.

STATE OF CONNECTICUT Fiduciary Funds

Trust and Agency Funds are maintained to account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations or other funds. These Fiduciary Funds include expendable trust, nonexpendable trust, pension trust, investment trust, and agency funds. Significant Trust and Agency Funds of the State are described as follows:

Trust Funds

Employment Security:

to account for the collection of unemployment insurance premiums from employers and the payment of unemployment benefits to eligible claimants.

Second Injury and Compensation Assurance:

an extension of the Worker's Compensation Act, the fund is currently used to pay claimants whose injuries are made more severe because of a preexisting condition, and in cases where an injured worker receiving worker's compensation subsequently undergoes an incapacitating relapse.

Soldiers', Sailors', and Marines':

to account for the principal and interest earned on investments of this fund. Interest earned has been earmarked by the General Assembly for the benefit of resident veterans to provide such things as food, wearing apparel, medical or surgical aid, care and relief or funeral benefits.

Pension:

See notes 9 and 10 for a description of the Pension Funds.

External Investment Pool:

to account for the portion of the Short-Term Investment Fund that belongs to participants that are not part of the State's financial reporting entity.

Agency Funds

Insurance Companies Securities:

to account for securities that are deposited with the Treasurer to be held for policyholders of insurance companies as a prerequisite to such companies transacting business in the State.

Deferred Compensation:

to account for the investments accumulated in the State's IRC Section 457 deferred compensation plan.

STATE OF CONNECTICUT General Fixed Assets Account Group

The General Fixed Assets Account Group is maintained to account for land, buildings, improvements, and equipment which are accounted for in the governmental type funds. Fixed Assets of the proprietary fund types and similar trusts and the Higher Education Funds are accounted for within those funds. Infrastructures, including highways, bridges, and rights-of-way are not capitalized.

The General Fixed Assets Account Group is stated at historical cost or estimated historical cost, with no provision made for depreciation.

STATE OF CONNECTICUT Higher Education Funds

Higher Education Funds are used to account for all transactions relating to public institutions of higher education and an affiliated organization. Higher Education institutions include five universities and twelve community-technical colleges. The following university and college funds and affiliated organization are used:

Current Unrestricted Fund:

accounts for currently expendable resources which may be either designated or not designated by the colleges and universities for specific purposes.

Current Restricted Fund:

accounts for resources restricted by the donor or external agency for a specific use or program.

Loan Funds:

accounts for loans made to assist students in the financing of their education.

Endowment Funds:

accounts for resources which are restricted by the gift instruments requiring that the principal be invested and only the income be expended.

Agency Funds:

accounts for amounts held in custody for students, university-related organizations, and others.

Plant Funds:

accounts for activities relating to institutional properties. These activities include funds used for the acquisition, renewal, and replacement of institutional properties, funds set aside for debt service requirements of institutional properties, and funds invested in institutional properties.

Affiliated Organization:

accounts for the financial activities of the University of Connecticut Foundation, Inc., a component unit of the University of Connecticut.
